

PUBLIC WARNING.

Selling buyers of SEWING MACHINES, are cautioned against buying inferior but much-puffed and low-priced machines, which are compelled to make foolish and unwarranted statements in order to force sale. No SEWING MACHINE, compare with the genuine SINGER, either in its value or in its appreciation by the discerning public. SINGER has defeated every competitor, having last year reached a sale of A QUARTER MILLION. This year 1876 has closed the SINGER, THE BEST MACHINE MADE. Its actual sales in 1876 were Two hundred and forty-nine thousand eight hundred and fifty-two. No rival approaches this stupendous total. The only agents for the genuine SINGER are

ALFRED SHAW & CO., QUEEN STREET, BRISBANE,

Who are selling at reduced prices, and giving long credit when required, so that no family need be without this invaluable help. The SINGER Machines beat all others at the Centennial Exhibition and at the late Brisbane Show. This should convince even rival agents that THE SINGER SEWING MACHINE is the best.

HEAD OFFICE, SYDNEY.

DIRECTORS:

Hon. JOHN SMITH, M.L.C., Chairman.	Hon. JOHN FAIRFAX, M.L.C., Deputy do.
Hon. SAUL SAMUEL, C.M.G., M.L.C.	ROBERT J. KING, Esq.
Hon. ALEX. CAMPBELL, M.L.C.	ISAAC ELLIS IVES, Esq.

QUEENSLAND BRANCH OFFICE, QUEEN STREET, BRISBANE.

DIRECTORS:

J. S. TURNER, Esq., Chairman.	KEARSEY CANNAN, Esq., MD., Deputy do.
EDWARD B. FORREST, Esq.	JAMES F. GARRICK, Esq.
LEWIS A. BERNAYS, Esq.	

THE Directors invite attention to the following important advantages afforded by the **NEW REGULATIONS** of the SOCIETY.

Members are allowed without license or payment of extra premium, to travel all over the world or to reside in any part of the world, distant more than 25 degrees from the equator: in Queensland 22 degrees from the equator. Permission to reside within the above degrees is granted on payment of an extra premium of 1 per cent. per annum on the amount of the policy.

Policies of five years' duration become absolutely indisputable, *provided* the regular premiums are paid, the assured has attained the age of 30, has resided continuously within the ordinary limits from the date of the policy until attaining the age of 30, and has obtained admission of age.

Policies are not forfeited if the surrender value is sufficient to pay one yearly premium; and are not irretrievably forfeited unless the renewal premiums remain unpaid for thirteen months after the surrender value has been exhausted. In the event of death occurring during the above period, or during the Thirty Days of Grace ordinarily allowed by the Society, the policy will remain in full force, but the premium if not previously paid will be deducted from the amount payable under the policy.

Members may, at any time convenient to themselves, exchange their reversionary bonus additions for cash, or apply them in reduction of future premiums. Members can also borrow from the Society on the security of their policies, to the extent of 90 per cent. of the surrender value.

Prospectuses with table of rates and forms of proposal with every requisite information may be obtained on written or personal application to any of the Society's Agents established in all the principal Towns of the Colony, or to

ADDRESS TO SUBSCRIBERS, TO SLATER'S QUEENSLAND ALMANAC.

Considerable efforts have been made, to render the present edition of this well-known Almanac, still more worthy of the generous support that has for many years past been accorded to it.

The Calendar Pages have been re-cast, and the Moon's rising and setting and Tide Tables added. Other additions to this portion of the Almanac have been; Notes of the Month, Meteorological Observations for 1876, a Diary for each month, and the Lessons for each Sunday of the year.

A Postal Gazetteer has been added as a new feature; also full particulars of the Railway rates that have recently come into operation. The Chronological Record of the principal occurrences in the history of the colony, the Summary of Events, and the Obituary, will it is hoped, be found of interest. The Colored Map, prepared at considerable expense, will, it is believed, be found an acceptable accompaniment to the Almanac.

As the Publishers desire to make the Almanac as useful as possible, they will be glad to receive any suggestions that will tend to this result; they will also thank any correspondent who will point out any inaccuracies that may have crept into the present edition.

GENERAL INDEX.

ROYAL INSURANCE COMPANY,

FIRE & LIFE

Capital - - £2,000,000 Sterling.

FIRE DEPARTMENT.

Net Premiums for the year 1874 - - £774,631 10 2
Losses - - - 402,191 18 11

Policies issued in Brisbane at Current Rates. Losses promptly settled by the undersigned.

LIFE DEPARTMENT.

Income for 1874 from premiums, after deducting re-assurances £240,635 19s. 1d. Bonus declared was equal to 7½ per cent. for the Quinquennium ending 31st December 1874, upon all policies of 2 years standing and upwards.

The recent Report issued by the Board of Trade shews that of all the English Provincial Life Offices, and of all the Scotch Offices the ROYAL'S ratio of expense to its premium income is "absolutely the lowest," and the tests laid down by the Board of Trade as requisites of a sound and prosperous Company are shewn to be entirely satisfied by the ROYAL.

FUNDS.

After providing for payment of Dividend and Bonuses the Funds of the Company on 31st December 1874, would stand as follows:—

Capital paid up	-	-	-	£289,545	0	0
Fire Fund	-	-	-	354,637	10	0
Reserve and Profit and Loss	-	-	-	459,981	0	4
Life Funds	-	-	-	1,853,011	2	0
Total	-	-	-	£2,957,174	12	4

SOUTH BRITISH INSURANCE COMPANY.

FIRE AND MARINE.

Established, 1872. Capital, £750,000.

With Unlimited Liability of Large Body of Shareholders.

Head Office—QUEEN STREET, AUCKLAND.

DIRECTORS:

CHAIRMAN - - -
A. BEETHAM, Esq.
HON. HY. CHAMBERLIN.
JOSEPH HOWARD, Esq.

CAPT. W. C. DALDY.
WM. EARL, Esq.
STANNUS JONES, Esq.
THOMAS MORRIN, Esq.

MANAGER:

A. BOARDMAN, Esq.

BANKERS:

UNION BANK OF AUSTRALIA.

THIS Company transacts every class of Fire and Marine business at lowest Current Rates. It is well known for prompt and liberal settlement of claims. Its large Capital and very numerous and influential proprietary, with unlimited liability of the Shareholders, give the most complete security to the insured. Its popularity among the insuring public is attested by the large and rapid increase of its Premium Income.

PREMIUM RECEIPTS

ECLIPSES OF THE SUN AND MOON.

In the Year 1877, there will be Three Eclipses of the Sun, and Two of the Moon.

- I.—A Total Eclipse of the Moon, February 27, invisible in Queensland.
- II.—A Partial Eclipse of the Sun, March 14, invisible in Queensland.
- III.—A Partial Eclipse of the Sun, August 8, invisible in Queensland.
- IV.—A Total Eclipse of the Moon, August 23, invisible in Queensland.
- V.—A Partial Eclipse of the Sun, September 6-7, invisible in Queensland.

MOON'S AGE.	WINTER MOONLIGHT.	SUMMER MOONLIGHT.
1st to 3rd day	From dark until 7 p.m.	Almost invisible.
3rd to 8th day	From dark until 12 night.	From dark until 12 night.
8th to 12th day	From dark until 4 p.m.	From dark until daylight.
12th to 16th day	From 7 p.m. till daylight.	From 7 p.m. until daylight.
16th to 23rd day	From 9 p.m. till daylight.	From 9 p.m. till daylight.
23rd to 29th day	From 1 a.m. till daylight.	From 1 a.m. till daylight.

RULES FOR FORETELLING THE WEATHER ACCORDING TO THE RISE AND FALL OF THE BAROMETER.

THE BAROMETER RISES.
For Southerly Wind (including from South-west by the South to the Eastward.)
For Dry or Less Wet Weather (if Very Wet Weather has been prevalent) for less wind, or for more than one of these changes, *except* on a few occasions when Rain comes from the Southward with strong wind.

THE BAROMETER FALLS.
For Northerly Wind (including from North East by the North to the Westward.)
For Wet Weather in Winter, for strong wind in Summer, or for more than one of these changes.
Except on a few occasions when moderate wind with Rain comes from the Southward.

THE CALENDAR—An Astronomical Day commences at noon, and is counted from the first to the twenty-fourth hour. A Civil Day commences at midnight, and is counted from the first to the twelfth hour, when it is recounted again from the first to the twelfth hour. A Nautical Day is counted as a Civil Day, but commences, like an Astronomical Day at noon.

A Solar Day is measured by the rotation of the earth upon its axis, and is of different lengths, owing to the ellipticity of the earth's orbit and other causes; but a mean solar day, recorded by the time-piece is twenty-four hours long.

A Solar Year, which is the time occupied by the sun in passing from one vernal equinox to another, consists of 365.24244 solar days, or 365 days, 5 hours, 48 minutes and 49.536 seconds.

A Calendar Month varies in length from 28 to 31 days. A Mean Lunar Month is 29 days, 12 hours, 44 minutes, 2 seconds and 5.24 thirds.

NOTES OF THE MONTH.—January is named after the two faced Roman deity Janus, to whom the Romans presented on the first day of this month the Janual, an offering consisting of wine and fruits. On the same day the image of the god was crowned with laurel, the consul ascended in solemn procession to the capitol, and small presents were made to one another by friends. The month was added to the calendar along with February by the Emperor Numa. It was not until the eighteenth century that it was generally adopted by European nations as the first month of the year, although the Romans considered it as such as far back as 251 B. C.

JANUARY corresponds to July in Great Britain. It is usually one of the hottest months of the year, and is marked by frequent thunderstorms.

GARDENING CALENDAR.—The following directions for the guidance of the Farmer and Gardener in Queensland, may be relied on for the Eastern or Coast districts, but though the seasons occurring simultaneously on both sides of the Dividing Range permit many of the common operations, such as the preparation of the soil and sowing seeds, to be carried on about the same time, yet the difference of the climate produced by remoteness from the sea, and elevation above it, will force the cultivation into a different class of crops. The effects of this change in the climate are decidedly perceptible in the neighborhood of Ipswich. There the banana and the pineapple are no longer paying crops, and the sugar cane will have to be cut annually. There also the peach and other European fruits and vegetables begin to improve and show a decided superiority over those cultivated nearer the coast. As the coast is receded from, the change becomes more marked, till, on crossing the Main Range, farm and garden assume another aspect, scarcely any of the crops which are cultivated near the coast being seen except maize and oats hay.

GARDEN.—Attend to the grapes as they ripen. Those wanted to hang till dead ripe, should have the foliage so arranged as to be shielded from the rays of the sun. The Isabella may still be cut for late crop. Strong shoots of favorite grapes may be bent down and layered; in this way better rooted plants may be obtained than cuttings can produce, and a season saved. Peach trees should now be allowed, and encouraged, to make a sufficiency of wood for next season's crop. Attend to the pinching and shortening of young shoots on apple and pear trees. Stone fruited-trees may now be budded. Make a small sowing of cucumber, French beans, and marrows for late crops. Intending cultivators of celery, cauliflower, cabbages, &c., should get together as much manure as possible, the quality of which will be much improved by frequent turning, and being sheltered from rain, sun, and more particularly rain, the latter washing out the salts, on which its value depends. Make a small sowing of celery, cabbage, and cauliflower, in a shady place.

FIELD.—Sow maize for late crop. Sow patch of oats or barley for cutting green. Break up and prepare land for potatoes, lucerne, &c. In breaking up land, it is better to leave the surface rough and open to the action of the sun's rays, which are the best pulverent. A rough surface also retards the growth of weeds. Arrowroot is now making its growth, and ought to be kept clean to allow the free circulation of air.

NOTES OF THE MONTH.—February so named because the Februalia, a feast of purification and expiation, was celebrated in Rome during this month. Numa added it to the end of the year, and for this reason some have supposed that it derives its name from an old Latin word, fibar, meaning 'the end or extremity of anything.' The Decemvirs placed it after January—452 B. C.

ASH WEDNESDAY.—(Feb. 14.) is the first day of Lent, which extends over 40 days to Easter, and derives its name from penitents wearing sackcloth next their skin, and having ashes sprinkled on their heads, symbols of penitence that are derived from the ancient Jewish custom.

SHROVE TIDE.—Takes its title from the old practice of being shriven or shrove, that is of confessing sins and receiving absolution before the Lenten fast.

SEPTUAGESIMA SUNDAY is so called from being 70 days before Easter Day, Sexagesima is 60 days, Quinquagesima is 50 days, and Quadragesima is 40 days.

FEBRUARY corresponds to August in Great Britain; the weather is generally excessively hot and sultry with a humid atmosphere.

GARDENING CALENDAR—GARDEN.—Take advantage of moist and dull weather for sowing early crop—small quantities of vegetable and salad seeds. To guard against failure from scorching—cabbage, cauliflower, and celery seed beds should be protected by a shading of calico or sacking. A rough artificial shading may be made as follows:—Cut a few forked sticks about 18 inches long, place these in the ground to the depth of six inches, let saplings be laid on them, a few cross pieces will be sufficient to carry a sort of roof of boughs which will afford a fair protection from the rays of the sun. See to have some well-rotted dung prepared for celery trenches. Budding should be finished this month. In the flower garden, remove decayed foliage, and save valuable seeds as they ripen.

FIELD.—In sheltered situations along the seaboard, maize may be planted during the first two weeks of the month. Hill maize of former plantings; early hilling tends to keep down suckers. Continue the preparation of land for wheat, lucerne, and potatoes, and commence planting the latter; if in previous years the potatoes have been found spotted and faulty, it would be well to change the seed entirely, getting it from a cooler or hotter district as the case may be.

THE CALENDAR.—The Chinese civil year is lunar, and consists of twelve months, of twenty-nine and thirty days alternately. The Japanese divide the year into twelve months, corresponding to the twelve signs of the zodiac. The months, however, vary in length, and are regulated by the Religious Emperor. The Mohammedans reckon from July 15 or 16, the date of Mohammed's flight. Their months are lunar, and consist of thirty and twenty-nine days alternately, with a day added eleven times in a cycle of thirty years. The Parsees' year consists of 365 days; no leap year is known, but in every 120 years one month is added to make the conventional year correspond with the solar.

Christmas Day was transferred from January 6 to December 25 by Julius I, who flourished as Pope, 337 to 352 A.D.

Perigee means the point in the orbit of the moon which is nearest to the earth, Apogee the point at its greatest distance from the earth.

NOTES OF THE MONTH.—March, Latin Martius, derives its name from Mars, the god of war, the reputed father of Romulus. By the Saxons it was named Rhedi-monat or Rugged-month. March was the first month of the year in the old Roman calendar, and was so considered in England until the change of style in 1752, the English legal year being reckoned from the 25th of that month.

March 1.—The day of St. David, the patron saint of the Welsh.

March 12.—The day of St. Gregory—the Pope—who paid great attention to the study of Books and Music whence the term 'Gregorian' is derived.

March 17.—ST. PATRICK'S DAY.—Generally kept as a holiday in Queensland, is, as is well known the tutelary saint of Irishmen. The shamrock is worn in his honor, from (it is said) his having chosen it to illustrate to the pagan Irish the doctrine of the Trinity.

March 25.—PALM SUNDAY.—The Church of England commemorates the triumphal entry of Jesus into Jerusalem, when palm trees were strewn on the way.

March 30.—GOOD FRIDAY.—Is regarded as the solemn day of the ecclesiastical year, and is observed in memory of the crucifixion and death of the Saviour.

MARCH corresponds to September in Great Britain, and begins to show a pleasant decrease in the temperature. GARDENING CALENDAR.—GARDEN.—The scorching heat of the Queensland summer is now over, and as the rainy season has set in, this is the best time to enter thoroughly into the cultivation of European vegetables. Sow for full crops of cabbages, Savoys, cauliflowers, Brussels sprouts, couve tronchuda, turnips, carrots, onions, leeks, beans, peas, beets, parsnips, parsley, salad, &c. If any plants were raised from previous sowings, transplant on favorable occasions, that is, immediately prior to rainfall. It is a good plan to prick young cauliflowers into a bed of nice rich earth, placing them, about four inches apart; they occupy little room, and can be easily watered and shaded for a few days. It breaks their roots, they emit small fibres, become more sturdy and compact, and do not droop so much when finally put out. Couve tronchuda, or Braganza cabbage, is a vegetable of considerable value; the main ribs of the outside leaves resembles sea-kale when well boiled, but the heart is the best; it ought to get as much room as cauliflower. Cauliflowers yield a fair return when properly cultivated, but broccoli ought to be avoided by the cottager, as it is not suited to the climate, and does not expand its flower. Broad beans also frequently fail to pod, or do not pod till the spring; every bee-keeper, however, ought to sow a quart or two, as they afford a rich pasturage to the bee at a time of the year when flowers are scarce. In the flower garden sow a selection of hardy annuals. The bee-keeper will find it an advantage to sow plenty of mignonette, as that plant furnishes an abundant and continuous supply of honey and pollen.

FIELD.—This is the best month for planting potatoes, and the planting should be if possible, finished before the close of the month. Those planted last month should be hoed in due time, and the weeds well turned up to the sun. Sow mangold wurtzel; this plant is worthy of a trial by those interested in the home feeding of cattle.

NOTES OF THE MONTH.—April, Latin Aprilis, from aperire, to open, so called because it was the season when the buds began to open.

April 1—ALL FOOLS DAY.—A day when practical jokes, frequently of a stupid and mischievous character, are supposed to be licensed.

April 1—EASTER SUNDAY, or Easter Day (derived from the Saxon oster, to rise) is the festival of the Church of England, kept as the anniversary of the resurrection. In England it is generally a harbinger of spring time, when the plants and flowers begin to return to life, and nature herself seems to be illustrating and commemorating the grand doctrine of the rising from the dead.

April 4—The day of St. Ambrose, bishop, the reputed author of the Te Deum, of the English prayer book.

April 23—The day of St. George, the patron saint of England.

APRIL corresponds to October in Great Britain; cool weather is now setting in, and nights are frequently chilly. GARDENING CALENDAR.—GARDEN.—Attend to those vegetables which were sown last month; beans and peas should be kept clean; cabbages and cauliflowers, when fit to handle, should be transplanted; turnips and carrots should be thinned. Sow some of the more suitable vegetables and salads for succession; but the cottage gardener will find little satisfaction from cauliflowers, Savoys or Brussels Sprouts; if sown late this month—his principal dependence for greens should be on the cabbage. Bananas during this and the next month are too apt to break down; heavy branches should be propped. Earth up celery if the weather is dry. In the flower garden, all alterations or additions should be made, as evergreen shrubs, roses, &c., bear moving well now. This is also a good time to transplant bulbs. Make a sowing of hardy annuals for spring decorations.

FIELD.—Prepare land for oats and hay crops, and sow a patch for cutting green. Land intended for lucerne should be cleaned, drained, and deeply cultivated. The rapidity with which summer grass and other weeds cover the surface of the soil during the early months of the year, and the soddening effects of heavy rain, will be an objection to the preparation of land long before seed time; but in the case of lucerne, no pains should be spared in getting a pulverised and mellow bed for the seed. Lucerne and Mangold wurtzel may now be sown.

THE CALENDAR.—Time is both apparent and mean. The sun is on the meridian at twelve o'clock on four days only in the year. It is sometimes as much as 16½ minutes before or after twelve when its shadows strike the Noon mark on the sun-dial. This is occasioned by the irregular motion of the earth on its axis and the inclination of its poles. This is called apparent time. Mean time is determined by the equitation of these irregularities for every day in the year.

METEOROLOGICAL OBSERVATIONS, JANUARY, 1876.

Weather warmer than usual. Highest reading of the thermometer in shade was 99.5, on January 20th; lowest 59.0, on January 14th. Highest barometer reading 30.116, on January 28th; lowest 29.645, on January 6th. Rain fell on 16 days, total rainfall 5.86 inches being 1.35 inches under the decennial average. Evaporation 8.430 inches. Prevailing winds S. and N.E.

NOTES OF THE MONTH.—May, Latin *Maïus*, from a word which signifies to grow. The advent of this month was generally hailed as a season of joy and gladness, and among the Romans this feeling found vent in the Floral Games. In England during the Middle ages it was customary on the first of May—May day—for both high and low to go out and gather fresh flowers, and May Games were popular in England, France, and Germany. It has also been stated that this month was named in honor of Maia, the mother of Mercury, but it was called *Maïus* before the Romans knew of Mercury. The Saxons called it *Tri-milchi*, from the abundance of milk at this period.

May 6—ROGATION SUNDAY.—This term is derived from the Latin verb *rogare*, to beseech—special prayers being appointed as a preparation for the observance of the Ascension.

May 10—ASCENSION DAY, is, as its name implies, held in observance of the Ascension into Heaven. In London it is the day for beating the bounds of the parish, when the parson, churchwardens, and beadle head a procession of the charity children and traverse the length and breadth of the parish limits.

May 20—WHITSUNTIDE commemorates the day of Pentecost, when the Holy Ghost fell upon the Apostles. It is supposed to take its name from the circumstance that in the primitive church the newly baptised appeared at worship between Easter and Pentecost in white garments.

May 24—The anniversary of the natal day of Queen Victoria; the day throughout the whole of the Australian group is set apart for holiday purposes.

May 27—TRINITY SUNDAY.—So called from the feast kept this day in honor of the Holy Trinity.

MAY corresponds to November in Great Britain. The Queensland winter may now be considered as having begun. Weather generally cool and enjoyable.

GARDENING CALENDAR.—GARDEN.—Sow cabbages, turnips, carrots, peas, onions, parsley, and culinary herbs—such as sage, marjoram, and thyme. Orange, and all evergreen fruit trees and ornamental shrubs may be planted during this and the two following months, but, when convenient, give this month the preference. A situation sheltered from westerly winds should be selected for azaleas and camellias—which flower during June, July, August, and September—as shelter very much prolongs the life of the flowers.

FIELD.—Sow lucerne.—If this seed were sown in drills, so as to permit of being hoed as farmers do their wheat in England, it would give the young plants a good start, and would much promote the subsequent vigor and luxuriance of the crop; if drilled, five pounds less seed may be given to the acre. As spring maize, from the general dryness of the season, frequently yields but a poor return, it is better to sow a small breadth of this crop and in its stead to have oat hay, the stubble of which, when ploughed in November and December, will give a full crop of maize. Commence oat sowing for hay crop, sowing the poorest soils first. Sow also wheat for grain crop. Look to the hilling of potatoes.

NOTES OF THE MONTH.—JUNE.—There are various suppositions respecting the origin of the name of this month. It is variously derived from juniore, the young men, to whom Romulus is said to have assigned it; from Junius Brutus, the first consul; from jungo, to join, with reference to the union of the Romans and Sabines; from the Latin Junius, for Junonius; from Juno, because it was sacred to the Goddess.

June 17—ST. ALBAN'S DAY.—So called after the first English Martyr.

June 18—The anniversary of the Battle of Waterloo, when the power and ambition of Napoleon Buonaparte were hopelessly shattered by the combined English and Prussian forces.

June 20—The anniversary of the Queen's Accession to the throne.

June 24—In England Midsummer day closes the second quarter of the year, is here nearer Midwinter day.

JUNE corresponds to December in Great Britain; weather generally cool, with fine clear nights and sometimes heavy dewfall.

GARDENING CALENDAR.—GARDEN.—Peaches, mulberries, quinces, apples, pears, &c., may now be transplanted, but young and vigorous growing late peaches and apples which are yet green, may be left for a week or two. The apple is coming into favor in the Southern part of Queensland; a few trees ought to be planted in every garden. The following are twelve sorts which bear well in the neighbourhood of Brisbane.—Nonsuch, Mobbs' Royal, Mammoth, Kirke's Golden Pippin, Five Crown Pippin, Greening, Smeating, Kerry Pippin, Golden Harvey Reinette, Blanche d'Espagne, Blenheim Pippin, Sykehouse Russet. Grape vines may be pruned, unless cuttings are wanted, in which case they had better be left till the middle of next month. If your vines are young, apply the knife fearlessly, cutting down to one or two eyes. Peaches, mulberries, figs, &c., should now be pruned, remembering that thorough pruning gives superior fruit. Heavy bunches of bananas should have a thin sack drawn over them, to protect them from the frost and the blighting influence of westerly winds. The bottom of the sack should be open, that the ripening of the fruit may be observed. Sow peas, turnips, onions, cabbages. In the flower garden, propagate petunias, verbenas, geraniums by cuttings, and herbaceous plants by division.

FIELD.—Continue to sow oats for hay, and the lucerne sowing ought to be finished this month. Make preparations for the manufacture of arrowroot.

METEOROLOGICAL OBSERVATIONS, FEBRUARY, 1876.

Weather colder than usual. Highest reading of the thermometer in shade was 99.5, on February 10th; lowest 59.0, on February 24th. Highest barometer reading 30.165, on February 12th; lowest 29.494, on February 10th. Rain fell on 14 days, total rainfall 5.57 inches being 2.71 inches under the decennial average. Evaporation 5.005 inches. Prevailing wind S.

NOTES OF THE MONTH.—July, originally called Quintilis, the fifth, because it was the fifth month in the old Roman calendar, March being the first month, was named Julius in honor of Julius Cæsar, who was born on the 12th of the month.

July 1—SEPARATION DAY, is generally observed as a holiday in Melbourne, being the anniversary of the day on which Victoria became independent of New South Wales.

July 4—A day of honor among Americans, when the British yoke was thrown off and the celebrated charter of independence was promulgated.

July 15—ST. SWITHIN'S DAY.—In the country districts of England supposed to be the christening day of the apple. It is still a superstition there that if it rains on this day it will continue for forty days. St. Swithin is credited with having performed many miracles, the most remarkable of which, giving rise to the superstition just stated, was that he caused a rain of 40 days continuance to testify his displeasure at an attempt to bury him in the church instead of the churchyard.

JULY corresponds to January in Great Britain, and like it is the coldest month of the year, though the sun has considerable power in the middle of the day.

GARDENING CALENDAR.—GARDEN.—Go on with the pruning of deciduous trees, (trees whose leaves fall). Vine pruning ought to be finished, and if an increase of plants is wanted, cuttings ought to be taken from straight well-ripened wood of last year's growth; they should be about fifteen inches long, and three-fourths of their length should go in the ground, and the earth should be well trod round their base. Orange grafting should be commenced. In the flower garden, dig the flower beds, give a dressing of well rotted manure where it is required. Frame roses, and sow such annuals as sweet peas, larkspurs, lupins, zinnias, Phlox Drummondii, calliopsis tinctorius, and German stocks. Re-pot fuchsias. The following selection of roses will give satisfaction to every one who will take the trouble to cultivate them:—Souverain de Malmaison, Souvenir d'un ami, Safrano, Gloire de Dijon, Indica alba, Cranose superieure, Fairy, Princess Adelaide, Prince Albert, Bourbon Queen, Marechal Niel, Geant des Batailles, Prince Camilla de Rohan, Lord Macaulay.

FIELD.—The farmer ought to look forward to the planting of potatoes, sweet potatoes, cotton, arrowroot and oats for hay, and lay his plans and prepare his ground accordingly; the plough should therefore be kept going, and the harrow and roller should follow the plough closely, to prevent evaporation. A few potatoes should be planted, and the manufacture of arrowroot proceeded with.

METEOROLOGICAL OBSERVATIONS, MARCH, 1876.

Weather warmer than usual. Highest reading of the thermometer in shade was 95.5, on March 9th; lowest 58.5, on March 26th. Highest barometer reading 30.207, on March 25rd; lowest 29.795, on March 31st. Rain fell on 14 days, total rainfall 2.49 inches, being 5.72 inches under the decennial average. Evaporation 6.510 inches. Prevailing winds S. and S.E.

NOTES OF THE MONTH.—August, originally styled Sextilis, received its present name from the Emperor Augustus, on account of several of the most fortunate events of his life having occurred during this month. Before his time it was called Sextilis, being the sixth month of the year according to the old Roman Calendar.

LAMMAS DAY.—Is one of the old Scotch Quarter days. It has been said to derive its origin from St. Peter being the supposed patron of lambs, the Mass being instituted in his honor, that lambs might escape the danger arising from cold after being shorn at that season. The ancient Britons were accustomed to celebrate the day by the offering of a loaf made of new corn to Ceres the Goddess of tillage and corn.

AUGUST in England is the harvest month, when the sickle or rather the reaping machine is put to the corn, and the fruits of the earth are gathered and garnered.

AUGUST corresponds to February in Great Britain, is for the most part cold, but towards the end a rise in the temperature may be noticed.

GARDENING CALENDAR.—GARDEN.—Orange grafting should be finished the first week of this month, and pears, apples, peaches, grapes, &c., as soon after as possible. The transplanting of trees should be finished, during this and the following month; some trees and plants may require watering, and every newly planted tree, if the weather be dry, should be well settled in its place with water and some litter placed over the roots to prevent the ground from baking. In all cases where watering has to be done, as much should be given as will keep the ground moist for a considerable time, as frequent sprinklings are much more injurious than useful. The earth is the storehouse whence the plants draw their supplies, and which must come to them in the shape of moisture or vapour. The heat of the sun will call up as much moisture from the lower strata of the soil as will keep plants alive, and in some degree of health, long after the upper surface is parched and unfit for vegetation. The roots of plants spread themselves downward and outward to catch the moisture as it passes, at the bidding of the sun, to the atmosphere, and the foliage of plants accommodates itself to its circumstances, by becoming hard and evaporating less; or, in other words, it is forced to practice economy during bad times. There are few soils porous enough in their texture to bear frequent surface waterings in bright weather, as, when water is given, it brings them to a condition more or less resembling mortar, while the next day's sunshine transmutes them to a state which may be described as "bricky." This rapid battering of the soil is accompanied by a strong evaporation, which is chilling and injurious to the foliage of the plants through which it passes; hence the rusty and unhealthy appearance of most plants which undergo a bi-weekly sprinkling. Where it is absolutely necessary to practice surface watering let it be done after sundown, and the ground forked up next day. Make a small sowing in a sheltered place of cucumbers, melons, and French beans.

FIELD.—Potato planting should be finished early this month. It is also well to begin the planting of maize, as the sooner it is planted the deeper it will root before the warm weather begins. Finish the making of arrowroot, and arrowroot may be planted.

NOTES OF THE MONTH.—SEPTEMBER.—From the Latin Septem, seven, derives its name from having been the seventh month in the old Roman calendar. The Saxons called it Gerst-monat, from Gerst-barley, as that cereal in their time would be ripe for the sickle.

September 1—Partridge shooting begins in England, and "from the wheaten stubble is heard the frequent gun."

September 2—The seventh anniversary of the disastrous capitulation at Sedan when the star of Napoleon III. for ever set.

September 3—The anniversary of the day when Oliver Cromwell died, also the day on which some of his greatest successes were obtained.

September 29—MICHAELMAS DAY.—The third quarter day of the year.

SEPTEMBER corresponds to March in Great Britain, and may be considered a herald of spring.

GARDENING CALENDAR.—GARDEN.—Pears and apples may still be grafted. The grape vines will now be pushing, and stakes and trellising, if not already attended to, should be got into proper repair at once. Galvanised wire, supported on hardwood posts, makes a durable and cheap trellis. Attend to the vines as they break, and rub off superfluous shoots from the root and branches of the vine, and tie in young fruiting shoots in good time. White maize (not Tuscorora), if sown occasionally during this and the following months till January, will yield a vegetable, if used green, equal to green peas. Sow hibiscus rosella, make full sowing of French beans, cucumbers, rock and water melons, marrows, pumpkins, tomatoes, and capiscums. Transplant cabbages on favorable occasions. This is one of the driest periods of the year, and it is consequently a good time for the destruction of weeds. If the walks and flower borders get a thorough cleaning just now, they will not give much trouble for some time. A neat verge or border for the walks greatly enhances the appearance of a garden; Euphorbia Bojars may be suggested as valuable for this purpose; it is easily propagated by division and cutting; is compact in its habit, and may easily be kept in trim; it stands the drought well, and is in flower during the greater part of the year. Dahlias will now be pushing, and should be put up. Fuchsias, also, will be growing fast, and ought to be carefully tended. If no cuttings were struck last month, it may still be done, selecting short-pointed stiff young wood.

FIELD.—Finish maize planting for spring crop. Grow sorghum for green fodder. Plant arrowroot and sweet potatoes, sow cotton, tobacco, &c. Hill potatoes. Prune cotton; it is better to prune low—about six inches from the surface of the ground.

METEOROLOGICAL OBSERVATIONS, APRIL, 1876.

Weather above the average temperature. Highest reading of the thermometer in shade was 90.0, on April 16th; lowest 49.0, on April 2nd; mean for the month 71.6. Highest barometric reading 30.324, on April 24th; lowest 29.744, on April 14th. Rain fell on 7 days, total rainfall 4.00 inches, being 1.41 inches under the decennial average. Evaporation 5.990 inches. Prevailing wind S.

NOTES OF THE MONTH.—October also takes its name from the Latin numeral Octo, eight, being the eighth month in the old Roman Calendar.

October 9—ST. DENIS' DAY.—The patron saint of France.

October 18—ST. LUKE'S DAY.—The "beloved physician" the writer of the Gospel bearing his name, and also of the Acts of the Apostles.

October 25—ST. CRISPIN'S DAY.—The patron saint of Cordwainers and Shoemakers.

October 27—Is the anniversary of the birth day of Captain Cook, the practical discoverer of Australia.

October 31—ALL HALLOWS' EVE.—Formerly celebrated with sports and games.

OCTOBER corresponds to April in Great Britain; weather begins to be unpleasantly hot, with occasional thunder and sometimes heavy hail storms.

GARDENING CALENDAR.—GARDEN.—Peach trees ought to be well attended to at this season; all young shoots, but more especially the gross ones, should be pruned away. Those who will take this trouble will secure large fruit. The minor enemies of the cultivator will now be manifesting their power. The ground ought to be cleared of the roots of cauliflowers and savoy destroyed by the aphids, but some roots of the cabbage may be left in the ground as they yield a supply of wholesome greens in summer. The grub may be committing ravages among the potatoes and maize, and the lady-bird among the marrows, cucumbers, and pumpkins; there is no cure for these pests but hand-killing, and it should be done. If the scale is spreading on the orange tree, dress with Gishurst's Compound, or reduce a strong clay to the consistence of cream, and apply it to the affected part; when it dries it will shell off and bring a great deal of the smut and scale with it. The vines will now require constant care; pinch laterals at their third or fourth leaf, and shoots disposed to ramble should be stopped. In tying in, dispose of the foliage so as to shade the fruit. It will be necessary after the middle of this month, to keep a sharp look out for that dread scourge of the grape vine, *Oidium Tuckerii*. If the slightest trace of the disease is discovered, sulphur should at once be applied, either by itself or mixed with any proportion of finely sifted lime up to one half. Sow cucumbers for succession. Plant pineapples and bananas. In the flower garden, sow such annuals as balsams, coxcombs, nasturtiums, and amaranths.

FIELD.—If potatoes have not been already earthed up, do it at once, and do it carefully, on account of the great heat to which they will be subjected before they are ripe. Plant sweet potatoes, sow cotton, transplant tobacco. Cotton pruning should be finished the first week of this month.

METEOROLOGICAL OBSERVATIONS, MAY, 1876.

Weather warmer than usual. Highest reading of the thermometer in shade was 86.0, on May 1st and 2nd; lowest 50.5, on May 15th. Highest barometric reading 30.388, on May 16th; lowest 29.832, on May 7th. Rain fell on 20 days, total rainfall 13.85 inches being 11.29 inches above the decennial average. Greatest rainfall in 24 hours was 3.00, inches on May 27th. Evaporation 3,500 inches. Prevailing wind S.

NOTES OF THE MONTH.—November was the ninth month in the old Roman calendar, and takes its name from the Latin *Novem* nine. The Saxons styled it *Wind-monat*, or *Wind-month*, and *Blot-monat*, or *Blood-month*, because at this time they killed their oxen, sheep, and pigs, for salting for the winter.

November 1—**ALL SAINTS' DAY.**—So called in honor of the Roman Pantheon being consecrated as a Christian Church in A.D. 607.

November 5—Known as the gunpowder plot, is the anniversary of the day when a band of conspirators had arranged by exploding barrels of gunpowder in the vaults of the House of Parliament to destroy the members. The plot was discovered through the sagacity of the King, and Guido Fawkes, and the other ringleaders were captured and executed.

November 9—The anniversary of the birthday of the Prince of Wales. In London it is known as Lord Mayor's day, when the installation of this civic functionary takes place, a procession called the Lord Mayor's Show, once a pageant, and even now something of a spectacle, traversing the principal streets of the ward, of which he may be the Alderman.

November 30—**ST. ANDREW'S DAY.**—So named in honor of St. Andrew the patron saint of Scotland.

NOVEMBER corresponds to May in Great Britain. Summer has now fairly set in and the heat begins to be oppressive; the nights though on elevated positions are cool and pleasant.

GARDENING CALENDAR.—**GARDEN.**—Intending planters of pineapples and bananas should now be busy in order that the plants may derive the full benefit of the coming summer. It is time lost to put in these plants in autumn or winter, as they do not start into growth till roused by the heat of the following season. The Isabella, and some other grape vines, will yield a second crop if some of the strong shoots are now cut. In every bud along the cane the embryo flower for the next season is embedded, and if the shoot is cut while the sap is flowing strong in the vine, one or two of the buds next below the cut will burst and, in the case of the Isabella, flower and bear fruit. In most of the other varieties, the flower, not being forward enough, either drops prematurely, or is absorbed into the young shoot. Begin with a few shoots of the Isabella. Attend to the training of the grape vine generally, remove suckers and all barren shoots that will not be wanted, for next year, pinch laterals and shoots rambling beyond due bounds.

FIELD.—Hay-making should be finished, and the stubble ploughed for winter maize; it is better, however not to put in the maize seed this month, as the crop will be more heavy and regular if planted in December or January. There are often a great many blind or barren stalks in maize planted in November.

METEOROLOGICAL OBSERVATIONS, JUNE, 1876.

Weather cooler than usual, mean shade temperature being 60.3. Highest reading of the thermometer in shade was 80.5, on June 16th; lowest 40.0, on June 8th. Highest barometric reading 30.437, on June 18th; lowest 29.853, on June 6th. Rain fell on 13 days, total rainfall 2.63 inches being 2.10 inches under the decennial average. Evaporation 3.650 inches. Prevailing winds S. and S.W.

NOTES OF THE MONTH.—December the last month of the present chronological year, was the tenth month of the old Roman calendar, and takes its name from the Latin Decem. Ten. The Druids at this time celebrated their great feast of Thor. By the Saxons it was styled Winter-monat, or Winter-month, and also Halig-monat, or Holy-month, in remembrance of the birth of Christ.

ADVENT.—Is the beginning of the ecclesiastical year; it points to the second coming of Christ.

December 21.—ST. THOMAS DAY.—The 'unbelieving' disciple whose want of faith has caused his name to be thus handed down.

CHRISTMAS DAY.—Celebrates the birthday of Jesus Christ. In Australia a day of picnics and out-door festivities. In England a time of rejoicing when the poor are remembered and the scattered members of families once more unite under the old roof-tree in "that dear old place called home."

December 27.—ST. JOHN.—The 'beloved disciple' the author of the Revelations and the Gospel bearing his name; he survived all the disciples, and finally suffered martyrdom.

December 31.—The last day of the year. The custom of observing the closing hours of the year by divine service, originating with John Wesley in what he called the "Watchnight Service," is now becoming very general with all denominations. Few, whatever their temperament may be, can pass this milestone of their days without some thoughts of a grave and solemn character.

DECEMBER corresponds to June in Great Britain. It is a month usually of fierce sunshine and cloudless skies; the nights are sometimes pleasantly cool.

GARDENING CALENDAR.—GARDEN.—It is a difficult matter to keep up a supply of vegetables during the summer months. French beans and marrows are the most certain, and foresight should be used in adapting the sowing to the probable demand. Good crops of pumpkins may be gathered from seed sown early this month. Should a day or two of moist dull weather occur, some cauliflower, cabbage, and celery seeds may be sown. If the *Oidium Tuckeri* is not yet subdued, use the following mixture:—One pound of sublimed sulphur, one pound of fresh-slacked lime, and one gallon of soft water. These are to be boiled for twenty minutes, and then strained. To this liquor add one gallon more water, and boil for twenty minutes longer. It is then to be allowed to cool. When used, mix one pint with ten gallons of water. Apply with a syringe.

FIELD.—Potatoes will now be fit to dig, a valuable addition to the fodder for home consumption may be obtained by cutting the maize tops. Plough wheat and oat stubbles, and plant maize for winter crop.

METEOROLOGICAL OBSERVATIONS, JULY, 1876.

Weather warmer than usual. Highest reading of the thermometer in shade was 75.0, on July 5th; lowest 35.5, on July 29th. Highest barometric reading 30.352, on July 31st; lowest 29.646, on July 15th. Rain fell on 5 days, total rainfall 7.18 inches being 3.83 inches above the decennial average. Evaporation 8.040 inches. Prevailing winds S.W. and W.

QUEENSLAND.

THE Colony of Queensland, the youngest of the Australian dependencies—its separate existence dating only from December 10th, 1859—comprises the whole of the North-eastern portion of the Continent of Australia, its boundaries being on the North the Gulf of Carpentaria, on the East the Pacific Ocean, on the West the Northern Territory of South Australia—the dividing line being the 141st meridian of longitude from the 29th to the 26th parallel, and thence the 138th meridian—and on the South the Colony of New South Wales. Its estimated area is 678,000 square miles or 433,920,000 square acres, being about twelve times the size of England and Wales. Its extreme length from North to South is 1300 miles, its breadth 800 miles, the coast line being about 2,550 miles. It was originally known under the name of the Moreton Bay District, this name having been conferred upon it by Captain Cook, to whom, in May, 1770, is due the honor of the discovery of its eastern seaboard; General Carpenter, of the Dutch East India Company, sharing with him the meed of praise as regards the western seaboard washed by the waters of the Gulf of Carpentaria, he having in 1628 explored and named this portion of the country. To Mr. Oxley, the Surveyor-General of New South Wales, the credit belongs of having practically begun the work of exploration and discovery. In 1823 he ascended and named the River Brisbane, selected the site of the future Capital, and ascertained to some extent the capabilities of the new country. The work begun by him has been carried on by many others, among whom may be enumerated Kennedy, Mitchell, Gregory, Leichhardt, Dalrymple, Landsborough, Walker, Hodgkinson, and Mulligan, while the enterprise of the squatter, and the restlessness of the miner in search of new fields for his labour, have also largely contributed to the geographical knowledge of the Colony, and in a few years' time little will remain to be known of its general features, though with the discoveries that are continually being made of its metals and minerals it will be long ere the extent of its wealth and resources is fully known.

It is now divided into twelve large districts—The Moreton, the Darling Downs, the Burnett and Wide Bay, the Port Curtis, the Leichhardt, the Maranoa, the Kennedy, the Mitchell, the Warrego, the Bourke, the Gregory, and the Cook.

The principal cities and towns are Brisbane, the Capital, situated on the banks of the river of the same name, about 25 miles inland from Moreton Bay, with a population of 26,911; Ipswich, on the Bremer River, about 22 miles W. of Brisbane, with a population of 7734; Maryborough, on the River Mary, about 180 miles N. of Brisbane, having about 6,000 inhabitants; Rockhampton, on the Fitzroy, 420 miles N.W. of Brisbane; and Cooktown, in the far North, on the Endeavour River, about 1050, miles N. of Brisbane, with a population of 3000.

The population of the whole Colony, according to the census of 1871, was 120,306—72,282 males, and 48,024 females. By the census taken on the night of May 1, 1876 the population was enumerated at 173,180, of whom 105,016 were males, and 68,164 were females.

REVENUE—CUSTOMS.—PUBLIC DEBT.—For the year ending June 30, 1876, the gross amount of the Public Revenue was £1,288,377 7s. 11d., the expenditure being £1,314,931 19s. During 1875 the exports amounted to £3,608,331, the imports to £3,194,312. The principal exports were copper ore and smelted, £111,263; cotton, £8,183; gold, £1,889,710; rum, £18,371; sugar, £70,007; tin—sand, ore, and smelted, £237,879; wool, £1,356,030; tallow, £48,001; hides, £80,374; preserved meats, £62,110; Miscellaneous, £237,403. The rate per head of population of the imports was £17 12s. 5d. The public debt of the colony is now £6,954,586, on which the annual interest is £346,254.

EDUCATION.—There are for the purposes of Education 231 schools, employing 595 teachers; an aggregate attendance of 33,643 scholars, the average attendance being 16,887. The total expenditure during the year 1875 was £83,219 14s. 9d., the cost of education per head being £2 9s. 5d. During 1875, 35 new schools were opened and 8 were closed.

AGRICULTURE.—The returns for the year 1875 were as follows:—Total area under crop, 77,347 acres; the principal crops being, wheat 5,161 acres; barley, 1,292 acres; oats, 4,119

acres; maize, 39,293 acres; potatoes, 3,056 acres; cotton, 1,674 acres; sugar cane, 13,459 acres; sown grasses for hay, 4124 acres; sown grass, &c., for green fodder, 1,521 acres; vines, 376 acres, Stock—Horses, 129,761; cattle, 1,805,210; sheep, 7,209,313; pigs, 46,417.

ELECTRIC TELEGRAPH.—On January 1st, 1876, 8,956½ miles of line with 5,229 miles of wire were in operation, there being 112 stations employing 239 officers.

RAILWAYS.—In the Southern, Western, and Northern Railways there were in all in September, 1876, 297 miles open. The receipts for the year ending June 30, 1876, were, £152,101 7s. 6d.

PUBLIC ROADS.—There are 9,441 miles of public roads throughout the colony, which have been constructed at an average cost of £19 15s. 10d per mile. There were expended on them during 1875, £173,594 6s. 10d.

SHIPPING.—During the year 1874, 713 vessels of 302,825 tons were entered inwards, and 657 vessels of 269,875 tons cleared outwards; and for the year ending December, 1875, there were 865 vessels entered of 392,868 tons, with crews numbering 26,500, and cleared outwards 882 vessels of 369,019 tons, with crews numbering 24,537.

Warde, St. Andrew, Brisbane	

REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Every Birth must be registered within sixty days, and every death within thirty days, next thereafter respectively; and neglect of this regulation renders the parties, whose duty it is to register, liable to a fine not exceeding £10. If sixty days have elapsed from the date of birth, the law requires the parent, or other person making the application to register such birth, to pay a fee of two shillings and sixpence, and, to make a solemn declaration of the facts before a Justice of the Peace, prior to the registration. If possible in all cases the father or mother ought to sign as informant. If unable to write, let a mark be made. No Birth can be registered after three years have elapsed from the date thereof.

Every Minister who has celebrated a marriage shall, within one month thereafter, transmit (in accordance with the Act 28 Victoria No. 15) the original certificate to the Registrar of the District, and every Minister who shall fail to transmit the certificate to the District Registrar, shall be liable to a fine of not less than £10 and not exceeding £50. Marriages must be solemnized between the hours of 8 a.m. and 8 p.m. Persons under age must produce the authority of parents or guardians or the marriage cannot take place.

In every case of burial, the Minister or officiating person ought to receive from the undertaker or person having charge of the funeral, a Certificate from the District Registrar, certifying the registration of the death—unless in the case of inquest, when a certificate from the Coroner or Magistrate holding the inquest will be sufficient; and if any dead body shall be buried without such certificate, the person who may bury the same, or perform any funeral or religious service for the burial, or who shall in any way dispose of the body, shall forthwith give notice of the facts to the District Registrar.

REGISTRATION OF BIRTHS, &c.—Continued.

NAMES OF REGISTRARS.

The Registry District comes first and is followed by the name and residence of the Registrar.

BALLONE—John Boyle Tonson, St. George

ASSIZES.

BOWEN CIRCUIT—CRIMINAL, February 26, May 14, August 13, November 19.
 CIVIL—February 27, May 15, August 14, Nov. 20.
 TOWNSVILLE CIRCUIT—CRIMINAL—May 2, October 31.
 CIVIL—May 3, November 1.
 COOKTOWN CIRCUIT—CRIMINAL—June 2, December 11.
 CIVIL—June 4, December 12.

GENERAL RULES.

The Court will not sit in Banco on any day in Term except the first four days and the last day of the Term, unless by adjournment or special appointment.

At all sittings of the Circuit Courts, Crown business will commence on the first day, and Civil business on the third day.

The Judge in Equity, or the Judge Ordinary in Matrimonial Causes, will sit on any Wednesday when there is business on the paper of which the parties shall have given him notice.

All bills, informations, petitions, notices, of motions and proceedings in the first instance, shall be marked in the margin under the title of the Court, with the name of one of the Judges, as for instance, "In the Supreme Court of Queensland. In Equity, (or Insolvency as the case may be.) The Chief Justice, or Mr. Justice ———."

All subsequent proceedings and hearings in the cause or matter requiring the presence of the Judge shall be taken and had before the Judge so named unless otherwise ordered, and unless during his absence on Circuit, or from any other cause or emergency, any other Judge may see fit to act upon any application made to him therein.

The Judge will sit only on his regular Chamber days for the despatch of business, unless a special day has been appointed by him, and notice thereof given to the Master in Equity, (or to the principal Registrar in Insolvency cases). In cases of accumulation of business before a Judge, the Court may, with the consent of the Judge, assign causes or matters to the other Judges in rotation.

Insolvency business will be taken by the Judge in Chambers on the ordinary Chamber days.

In case of pressure of business before any one Judge, the Court may, with the consent of the Judge, assign causes or matters to the other Judges in rotation.

Chamber days and hours shall, except as hereinafter provided, be Mondays, Wednesdays, and Fridays from 10 a.m. to half-past 10, unless there be business in progress; and at 10 a.m. the Registrar shall send to the Associate a list of all summonses and matters returnable at Chambers, together with all affidavits and papers connected therewith.

Chamber days and hours shall, during the Christmas and Winter Vacations, be Wednesdays, at the same hour.

The offices of the Supreme Court shall be open from 9 a.m. till 4 p.m. in Term and Vacation, upon all lawful days, except Saturdays, when the said offices shall be closed at 1 p.m.

The offices will be closed on New Year's Day, St. Patrick's Day, Good Friday, Easter Eve, Easter Monday, Queen's Birthday, Ascension Day, Prince of Wales' Birthday, St. Andrew's Day, Separation Day, Christmas Day, and three days following Christmas Day.

Christmas Vacation will commence on Saturday, 16th December, 1876, and end on Saturday, 3rd February, 1877.

Winter Vacation will commence on Saturday, 2nd June, 1877, and end on Saturday, 30th June, 1877.

DISTRICT COURT.—The District Court in Brisbane holds its sittings six times a year. Application for summonses must be made to the Registrar of the District Court (Supreme Court Buildings); service must be made 12 clear days before the date of hearing.

POSTAL AND TELEGRAPHIC INFORMATION.

All Letters, Packets, and Newspapers posted in Queensland that are required to be prepaid, must bear Queensland Postage Stamps.

LETTERS.

Town Letters delivered within the limits of the town where posted, not exceeding $\frac{1}{2}$ oz. ..	1d.	Overland to Victoria and South Australia—	
Every additional $\frac{1}{2}$ oz. or part ..	1d.	Not exceeding $\frac{1}{2}$ oz. ..	4d.
Country Letters not exceeding $\frac{1}{2}$ oz. ..	2d.	Every additional $\frac{1}{2}$ oz. or part thereof ..	4d.
Every additional $\frac{1}{2}$ oz. or part thereof ..	2d.	Letters to Great Britain, via Southampton or via California—	
Letters or Packets containing gold—		Not exceeding $\frac{1}{2}$ oz. ..	6d.
Not exceeding $\frac{1}{2}$ oz. ..	4d.	Every additional $\frac{1}{2}$ oz. or part ..	6d.
Every additional $\frac{1}{2}$ oz. or part thereof ..	4d.	Via Brindisi—	
Intercolonial Letters, that is to any of the Australian Colonies—		Not exceeding $\frac{1}{2}$ oz. ..	8d.
Not exceeding $\frac{1}{2}$ oz. ..	2d.	Every additional $\frac{1}{2}$ oz. or part ..	8d.
Every additional $\frac{1}{2}$ oz. or part ..	2d.		

The rates before mentioned for English mail letters, apply to both the Torres Straits and the P. and O. routes. Letters should be marked via Melbourne if to be sent that way, otherwise they will be forwarded by the Torres Straits Mail.

The late fee on letters is, Colonial or Intercolonial, 3d.; Foreign, 6d., to be paid by affixing to the letter the necessary postage stamps. Late letters can be posted on board the steamers up to the time of sailing.

Letters, packets, or newspapers can be registered by affixing a fourpenny stamp in addition to the proper postage. The adoption of registration is strongly urged in all cases where money, notes, or packets of value are sent, as the precautions taken with these almost ensures their safe delivery.

TOWN DELIVERIES.—In Brisbane there are two daily at 9.15 a.m. and 2 p.m. In Ipswich two deliveries at 9 a.m. and 2 p.m. In Rockhampton one regular delivery at 9 a.m. In Toowoomba two deliveries at 10 a.m. and 2 p.m. In Maryborough one regular delivery at 9 a.m. In Warwick one delivery at 9 a.m. In Gympie and Townsville one delivery.

POST OFFICE HOURS.—The Delivery Office is open from 9 a.m. to 5 p.m. daily, Sundays excepted.

The Dead Letter Office is open from 10 a.m. to 4 p.m., except on Saturdays, when it is closed at noon.

The Office for Registration of Letters is open from 10 a.m. to 4 p.m.

GENERAL RULES.

Any letter or packet posted for the Colony, the Australian Colonies, and the United Kingdom, will, if a single rate of postage be affixed, be forwarded and charged on delivery with double the postage deficient; but if any letter or packet does not bear that amount of postage it will be opened and returned to the sender.

Any letter or packet posted for transmission to British Colonies (excepting the Australian Colonies and New Zealand), and to foreign countries, with a few exceptions, whether sent direct or through the United Kingdom, will invariably be opened and returned to the sender unless it bears the full amount of postage payable thereon.

Letters and packets, on being re-directed, are charged the same amount of postage, in addition to the original postage, as would be payable if such letter or packet were originally posted at the place of re-direction.

A postmaster may refuse to receive or transmit by post any letter, packet, or package of newspapers exceeding sixteen ounces in weight or of inconvenient form or dimensions, or containing, or reasonably suspected to contain, any article likely to injure the other contents of the mail bags or any person.

UNCLAIMED LETTERS.

Letters, packets, and newspapers, if not claimed, are kept at the Post-office to which they are directed for a period of one month. If not claimed at the expiration of that time they are sent to the Dead Letter Office, and the letters are then advertised in the Government Gazette. Queensland letters (that is, letters posted within the Colony) if not claimed within one month from the date of such publication, are returned to the writer. Intercolonial letters, (that is, letters posted in any of the Australian Colonies or New Zealand), if not claimed within three months from the date of such publication, are returned unopened to the colony from which they were received. British and foreign letters (that is, letters posted in the United Kingdom, or at any place beyond the Australian Colonies), if not claimed within twelve months from the date of such publication, are returned unopened to the colony or country from which they were received.

PRIVATE LETTER BOXES.

These may be obtained on the following terms, viz :—

Without lock, £1 1s. per annum, payable half-yearly in advance.

With lock, £1 5s. per annum, payable in advance; and a deposit of 15s. when box is applied for, of which amount 10s. will be returned, when use of box is discontinued, provided the box is in good order and keys (triplicate) are given up complete. If the lock is rendered useless by loss of the keys or by any damage, the whole amount deposited will be forfeited. A new lock and keys will be supplied at any time, if required, on additional payment of 7s. 6d.

PRIVATE BAGS.

Settlers, upon Mail Routes, requiring the accommodation of a private bag, can obtain the same from either of the two Post Offices next to them upon payment (in advance) of a sum not exceeding Two Guineas per annum to the Postmaster, who has to make up the bag, subject to the following regulations viz :—

(1) The bag must be of leather, and provided at the cost of the person requiring it. (2) The Postmaster will close and seal securely before despatching it; and it must be returned in like manner, sealed with some seal, the impression of which is known by the Postmaster. (3) The bag may contain letters for all persons who give *written authorities* to the Postmaster to enclose them. The person paying for the private bag is responsible for the postage of all unpaid letters, and for the receipts for all those which may be registered.

EXEMPTION FROM POSTAGE RATES.

All Petitions or Addresses to Her Majesty, His Excellency the Governor, or the Executive or Legislative Council, not exceeding 32 oz. in weight, and without covers, or in covers open at the sides; Savings' Bank books; Letters on Government Insurance and Annuities (provided they be marked outside respectively "Government Savings' Bank," "Government Annuities," or "Government Life Insurance,") and Votes and proceedings of the Parliament.

NEWSPAPERS.

Newspapers are transmitted within the Colony, and for the neighboring Colonies, free of charge, if posted within seven days from the date of publication; if posted after that period, one penny each. Newspapers received from beyond the Colony, in monthly parts, are (when reposted) subject to a charge of 1d. for every number contained therein. Newspapers for the United Kingdom, 1d.; or, *via* Brindisi, not exceeding 4 ozs. 2d.; every 4 ozs. or fraction additional, 2d.

Newspapers to be with or without a cover open at both ends, but without enclosure, mark, or communication, other than the words "Newspaper only," the printed name, occupation, and address of the publisher or vendor, in addition to the name, occupation and address of the person to whom sent, otherwise they will not be transmitted. Newspapers re-posted must be prepaid 1d. each.

BOOK AND OTHER PACKETS.

Bankers' packets, containing notes, orders, cheques, pass-books, returns or other periodical statements; process of, or proceedings or pleadings in any Court, briefs, cases, and instructions for counsel, and their opinions thereon respectively, deeds, affidavits, policies of insurance, letters of attorney, depositions, or recognizances, patterns or samples of merchandise, having no intrinsic value, either unenclosed or enclosed in transparent bags, or in bags tied round the neck so as to be easily loosened and refastened; prices current and catalogues; vouchers, or returns, made by or to any officer in the public service; scrip, pamphlets, maps, plans, specifications, music, photographs (on paper), magazines, reviews, placards, almanacs, prospectuses, paintings, engravings, printers' proofs, or periodical publications other than newspapers; printed or plain books, writing paper and envelopes, seeds in transparent bags or papers, tied so as to be easily loosened and refastened, not exceeding 16 oz. in weight, can be sent through the post office at the undermentioned rates:—

For Queensland—	For the United Kingdom, (<i>via</i> Southampton,) and Australian Colonies—
Not exceeding 2 ozs. 1d.	Not exceeding 1 oz. 1d.
Above 2 ozs. but under 4 ozs. 2d.	Not exceeding 2 ozs. 2d.
Above 4 ozs. 3d.	Not exceeding 4 ozs. 4d.
Above 6 ozs. 4d.	Every additional 4 ozs. or part thereof 4d.
Every additional 2 ozs. or part thereof 1d.	
For the United Kingdom <i>via</i> Brindisi, within 1 oz., 5d.; 2 ozs., 6d.; 2 ozs. to 4 ozs., 7d.; and each additional 4 ozs., 7d.	

NOTE.—The books or packets must be in covers opened at the end or sides for inspection, have the contents legibly marked, must not exceed 3 lb. in weight nor the dimensions of two feet in length by one foot in width and depth, and must not contain any letter or writing save the address and the name and address of the sender. Packets in which these rules are infringed, or which are posted insufficiently stamped, will be returned to the sender, except in the case of the United Kingdom, where short postage will be charged and also a fine on delivery.

MONEY ORDERS.

MONEY ORDERS may be obtained between the hours of 10 a.m. and 3 p.m., (except on Saturdays, when the offices close at 12 o'clock,) and made payable at any Money Order Office in the Colony, [of which a list will be seen in the Postal Gazetteer in a subsequent page.]

QUEENSLAND.—For any sum not exceeding £2, threepence; above £2 but not exceeding £5, sixpence; above £5 but not exceeding £7, ninepence; above £7 but not exceeding £10, one shilling.

INTERCOLONIAL.—New South Wales, South Australia, Victoria, New Zealand, Tasmania, Western Australia.—For any sum not exceeding £5, one shilling; exceeding £5 and not exceeding £10, two shillings.

No order will be issued for more than £10. Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued.

Money Orders may be transmitted by Telegraph between any Money Order Office in Queensland, and between Queensland and any Money Order Office in New South Wales, Victoria, and South Australia having telegraphic communication, on payment of the usual telegraph charge for a message, in addition to the Money Order commission.

BRITISH.—At any Money Order Office in the United Kingdom.—For any sum not exceeding £2, one shilling; exceeding £2 and not exceeding £5, two shillings and sixpence; exceeding £5 and not exceeding £7, three shillings and sixpence; exceeding £7 and not exceeding £10, five shillings.

At about the same rates Money Orders can now be obtained on India, Germany, and other foreign countries.

ELECTRIC TELEGRAPH.

The Telegraph Stations in Queensland (see Postal Gazetteer for list of them) are open to receive messages from 9 a.m. to 6 p.m. daily, Sundays excepted. On Sundays the officers are in attendance at 9 a.m. for the receipt and despatch of telegrams of urgent importance. On special occasions when messages may be received after office hours an additional charge of 50 per cent. on the ordinary charge is made. The following are the charges:—

Between any two stations in the colony—	s. d.
Ten words (exclusive of name and address of sender and receiver)	1 0
Each additional word	0 1
To stations in New South Wales—	s. d.
Ten words	2 0
Each additional word	0 2
To stations in Victoria—	s. d.
Ten words	3 0
Each additional word	0 3
To stations in New Zealand—	s. d.
Ten words (address and signature are counted as part of the message)	10 6
Each additional word	1 0

To stations in South Australia, (exclusive of the Overland Line)—	s. d.
Ten words	3 0
Each additional word	0 3
To stations on Overland Line—	s. d.
Ten words	13 0
Each additional word	1 0
To stations in Tasmania—	s. d.
Ten words (only ten words are allowed free for address and signature)	8 0
Every additional five words	2 4

ELECTRIC TELEGRAPH.—Continued.

Press messages are charged one-half the ordinary rates, and are exempt from the additional charge for transmission after ordinary office hours.

At country post towns and railway stations, where no electric telegraph station is opened, postmasters and station masters have been appointed receivers of messages, which they will forward for transmission to the nearest electric telegraph station, by first post. Persons desirous of using this means of communication will hand their message to the postmaster, together with the cost of transmission, twopence for postage, and sixpence for the postmaster's fee. At railway stations, in addition to the usual charges one shilling for transmission must be paid. Message forms may be obtained on application to any such post-office, and the postmaster and station-master will furnish information as to the cost of transmission.

All messages will be held strictly confidential, and should be written in ink, in a legible manner, in plain language, on the proper form, and the address must contain all information necessary to avoid delay and ensure delivery, and must be signed by the sender in words as well as figures. Payment of all charges in advance will be required, except for replies to interrogatory messages which contain the words "Reply paid for," but in all such cases the interrogatory message must be produced. In cases of emergency or distress, special arrangements may be made for the receipt of messages payable by the receiver, if the sender deposits the amount or charges with the transmitting station; in such cases, the word "Collect" must be inserted in the address immediately before the name of the terminal station. This deposit will be returned in full if the receiver pays on delivery. When the sender wishes to pay for a reply, or have the message repeated, or posted, instructions are to be inserted in the address immediately before the name of the terminal station. Messages which are addressed beyond the limits of delivery can be posted to their destination free of charge. Messages may be transmitted in "cypher," in the English language, or "secret language," but cypher words must not contain more than three syllables, and words in secret language must not average more than five letters; an additional charge of fifty per cent. to be made for messages containing cypher or secret language. Messages will be delivered free within one mile of the station to which addressed. If beyond that distance according to the instructions contained in the address. Expenses incurred for portage, cab hire, or boat hire, payable by the receiver, will be charged. Messages addressed beyond the limits of delivery, or which do not contain special directions as to transport, may be posted to their address by the terminal telegraph stationmaster free of charge. The sender or receiver of message, on proving his or her identity, may receive certified copies of messages on giving the date and paying a fee of one shilling for each copy. In the event of an interruption to communication by which messages may be unusually delayed, it will be optional with the senders, on application before transmission, to withdraw their messages and receive back the amount paid. If desired, messages of consequence can be repeated from stations at which received to stations from which originally sent, on payment of an additional half-rate; but no responsibility will be undertaken nor any claim for compensation entertained for any errors or mistake in transmission or delay in delivery of messages.

INTERNATIONAL TELEGRAPH.

By the system of registration of name and address, and the adoption of the word by word scale of charging, the cost of telegraphing between Brisbane and London and many of the leading cities of India, China, Japan, Europe, the United States and other countries have been greatly reduced. It may be necessary to explain that the name and address of the sender and receiver being registered at the points of departure and arrival, a single word, letter, or number serves for their identification.

The principal conditions under which messages are transmitted are as follows:—

Words must not exceed ten letters. Only ordinary dictionary words allowed. Groups of figures will be charged at the rate of five to the word. Cypher telegrams may be used, but if so, must be collated, that is, repeated back in their entirety from station to station, for which half rate additional will be charged.

Registration can be effected at the Central Telegraph Office, Brisbane. No fee is charged. Messages can also be sent through Reuter's Telegram Co. and the Oriental Co., both of which have agents in Brisbane.

SCALE OF CHARGES.

For telegrams, inclusive of names and addresses, from any station in Queensland to places situated in the following countries:—

Price per word.				Price per word.			
		£	s. d.			£	s. d.
Aden		0	10 3	Japan (Nagasaki)		0	11 8
Algeria and Tunis		0	10 8	Java		0	4 5
China—Hong Kong		0	8 4	Penang		0	5 10
" Amoy		0	10 0	Persia (via Persian Gulf)		0	10 1
" Shanghai		0	10 0	Russia in Asia		0	11 8
" Cochín China		0	7 1	Singapore		0	5 10
Egypt		0	11 6	Turkey in Asia (Seaports)		0	9 5
Europe		0	10 8	" (Inland)		0	9 8
India (west of Chittagong)		0	8 1	" (Archipelago)		0	9 11
" (east		0	8 4	Europe, via Hong Kong and Amoor		£0	13 10
" (Ceylon)		0	8 4	United States		0	14 6

When the registration has not been effected the charge for a message of twenty words from any Telegraph Station in Queensland to London is £9 16s. 6d.

PASSENGER FARES, GOODS AND LIVE STOCK RATES.

Since SEPTEMBER 18th, 1876, the following Rates have been in force on the Southern and Western Line:—

PASSENGER FARES.

First Class, single journey .. 3d. per mile
Second Class 2d.
Minimum fare (except Brisbane, Toowong, and Milton).

First Class 1s.
Second Class 6d.
Return Tickets A Fare and a half.

On the Northern Railway the Passenger Fares are—

First Class, single journey .. 4d. per mile
Second Class 3d.

Return Tickets are only available upon the day of issue. On Fridays and Saturdays, Excursion Tickets will be issued on application at single fares for the double journey, available until the following Monday.

Children under 3 years of age, "Free"; over 3 and under 12, Half-Fares.

Season Tickets will be issued on application to the Railway Office, Brisbane, or the Traffic Manager, Rockhampton, for one, three, six, or twelve months, between all stations on the Southern, Western, and Northern Lines at greatly reduced rates, which can be learned on application at the before-mentioned offices.

SCHOLARS' TICKETS will be issued, at half the Season Ticket rates, to pupils attending any Grammar or other public school, upon application being made by the master of any such school, on a form to be obtained at Railway Stations.

PARCEL RATES.

SOUTHERN AND WESTERN LINES.

N.B.—No claim for loss or damage, for which the department is accountable, will be allowed, unless made within twenty-four hours of the arrival of the parcel or parcels; and the delivery of such parcel or parcels will be considered complete when notice of arrival is given to the consignee.

PARCEL RATES.

GAZETTEER OF POST TOWNS, TELEGRAPH STATIONS, MONEY ORDER OFFICES, SAVINGS BANKS, AND RAILWAY STATIONS.

WITH TIMES OF DEPARTURE OF MAILS FROM BRISBANE.

EXPLANATION.—The name of Post Town or Post Office is first given, then follows its distance and bearings from Brisbane (or other town when specially mentioned), if a Municipality, Money Order Office, Telegraph Station, Government Savings Bank, or Railway Station, the population (when possible from the Census of May 1, 1876), the name of Postmaster or Postmistress, and the day of departure of the mail from Brisbane. When the locality is simply a Telegraph or Railway Station, it will be found indicated by the words, "Telegraph Station only," or "Railway Station only." The distances in some cases are approximate only.

ABBREVIATIONS.—N. S. E. W. for the points of the Compass—Tel. Stn. for Telegraph Station; Ry. Stn. for Railway Station; Pop. for population; Mon. Tu. Wed. Th. Fri. Sat., for the days of the week.

The Steamers for the South—Sydney and Melbourne, generally leave the Brisbane Wharf at 12 noon, the mails closing at 11.20, though letters can be posted on board to the last moment.

The Steamers for the North—Maryborough, Rockhampton, &c.,—usually leave the Brisbane Wharf at one p.m. the mails closing at 12.20.

Letters for the Inland mails can be posted at the General Post Office up to 8 o'clock p.m.

ALLORA.—Municipality, 130 miles S.W.; Money Order Office, Telegraph, Savings Bank; 2½ miles distant from Hendon Ry. Sta.; Pop. 456; Postmistress, Mrs. James Gwynne; mail leaves daily.

ARAMAC.—750 miles N.W.; Savings Bank; Postmaster, Edward Schneider; Mail by every Rockhampton steamer.

BALLANDRAN.—216 miles S.W.; Pop. 300; Postmaster, Thos. H. Fletcher; weekly mail (Tuesdays).

BANANA.—320 miles N.W.; Telegraph and Savings Bank; Pop. 122; Postmaster, M. O. Neill; weekly mail (Sun.) and Rockhampton str.

BEENLEIGH.—23 miles S.; Money Order Office, Telegraph and Savings Bank; Postmaster, A. R. H. Pletzsker; Daily mail except Sat.

SIGNALS IN USE AT BRISBANE OBSERVATORY.

The numbers of the Flags may be easily recognised from their comprising as many divisions or stars as they are intended to represent. Any number higher than nine is indicated by one Flag over another—3 over 5 indicating 35. When two of the same figure require to be shown, as 11 or 22, the white Flag is used to indicate the second number—Eleven would be shown by the Flag for 1 and the substitute beneath it.

Vessels in sight to North or South of Cape Moreton—Descriptive Flag at the North or South yard-arm, according to the direction of the vessel

Numeral Flags under descriptive Flag when Port of departure can be ascertained.

Entering the Port—Signal from mast-head

Entering South Passage—Second Distinguishing Pendant below Descriptive Flag

Steamers coming up River—White Flag under Descriptive Flag

Two or more vessels of same description from same port—Numeral Pendant above Descriptive Flag

Vessels returning to Port—First Distinguishing Pendant below Descriptive Flag.

Vessels at Bar entering Port over night—Third Distinguishing Pendant below signal

Steamers going to anchor below Flats, waiting Tide—Third Distinguishing Pendant below Descriptive Flag

Ship of War—Union Jack below Descriptive Flag.

Vessels with Troops—Numeral Pendant below Descriptive Flag.

Vessel with Governor—Union Jack above Descriptive Flag.

Vessel with Immigrants—Red Ensign above usual Signal.

Steamer with English Mail—Red Ensign below usual Signal.

Vessel passed Port—Ball at Yard-arm, with Descriptive Flag under.

English Mail *via* Suez, arriving in any adjoining Colony—Red Ensign on Observatory Flag staff.

Via San Francisco—Blue Ensign, do., *via* Torres Straits, White Ensign, do., and kept flying for two hours.

A.S.N. Company's Steamers—Their Flag, which is divided diagonally into four parts, each side quarter blue, and top and bottom red.

DESCRIPTIVE FLAGS.

Steamer—Blue and Yellow Chequer.

Ship or Barque—Blue Flag.

Brig—White Flag with Red Square in Centre.

Schooner—Red Flag with Yellow Square in Centre.

Cutter—Yellow Flag with Blue Square in Centre.

26 Any other Port of Queensland		80 Ceylon	
27 Tweed River			

SHIPPING SIGNALS, MADE FROM SIGNAL STATION, GRASSY HILL, ENDEAVOUR RIVER.

A sail in sight to northward—Corresponding Flag.

A sail from southward in sight—Corresponding Flag under Ball.

When description of vessel can be made out—The descriptive Flag will be hoisted instead of previous Flag.

When Port of departure can be ascertained—The Numeral Pendants will be hoisted under Descriptive Flag.

The number of vessel signalled—Will be shown by the corresponding Numeral Pendant over Descriptive Flag.

On vessels anchoring outside Port—The Numeral Pendant, if hoisted, will be hauled down, and a White Pendant will be hoisted over the Distinguishing Flag, the signal being kept flying for a quarter of an hour.

On vessels anchoring inside (bar)—Same as above, except that White Pendant will be hoisted under the Distinguishing Flag.

Vessels passing the Port will be denoted by—The Descriptive Flag being lowered half-mast high and kept flying for a quarter of an hour.

On the arrival of a vessel with the Governor on board—The Jack over Descriptive Flag.

On the arrival of a ship of War—The Jack under Descriptive Flag.

On the arrival of a vessel with Emigrants—The Ensign over Descriptive Flag.

On the arrival of a vessel with English Mail—The Ensign under Descriptive Flag.

 Oct. 3.—At Ipswich, Charles Watkins, aged 75.

DIRECTIONS FOR

To avoid the evils and expenses of intestacy (death without a Will), the making of a will while the mind is clear, and unfettered by bodily pain, is strongly urged. The accomplishing this important duty will not hasten death one instant.

MAKING A WILL.

A CODICIL TO A WILL.
 Is to be made with the same regulations as the Will itself, and may be written thus :—

This is a Codicil to my last Will and Testament, bearing date the day of in the year of our Lord One Thousand Eight Hundred and , and I direct it may be taken as part thereof. I give, devise, and bequeath, &c. In witness whereof I have hereunto set my hand this day of in the year of our Lord One Thousand Eight Hundred and

A Will cannot be made in language too simple or concise; it must be written with ink, on paper or parchment, and if contained on one sheet, must be signed at the end by the Testator, in the presence of two or more Witnesses; and if written on more than one sheet, the Testator and the Witnesses must sign each sheet.

The following Form may suffice as a general guide:—

WILL.

This is the last Will and Testament of me, *John Brown, of Enoggera, near Brisbane, in the Colony of Queensland, Gentleman.* After payment of all my just debts, funeral, and other expenses, I give, devise, and bequeath unto (1)

And I hereby appoint (2)

Executor of this my Will. In Witness whereof I have hereunto set my hand this (3)

day in the year of our Lord One Thousand Eight Hundred and

Signed by the said *John Brown*, the Testator, and by him declared to be his last Will and Testament, in the presence of us, present at the same time, who in his presence, at his request, and in the presence of each other, have hereunto subscribed our names as Witnesses. (4)

Signed.....

(1) Here give the names of persons to whom the property is to be left.

(2) Here mention name of executor in full.

(3) Fill in the date. (4) Name to be signed.

GARDENING AND FARMING NOTES.

Let the draining and trenching of the ground be your first care. It is impossible to succeed to any extent with crops, vegetables, or flowers where the water is stagnant in the soil.

Gather fruit in dry weather and with the sun shining, and place it as carefully in the basket as if it were glass. The smallest bruise commences a decay.

Unless you want seed, remove the flower stems so soon as the bloom decays. The swelling of the seed pods checks the further growth and blossom of most plants.

Never grow the same crops, nor crops of the same family, twice successively on the same spot. Plants

of the same natural order should never succeed each other. Crops which must remain in the same ground for a number of years, such as seakale, rhubarb, strawberries, asparagus, &c., should be followed by crops of short occupation; such as French beans, for young use, salads, early cabbages, &c. Root or bulb crops such as carrots, parsnips, potatoes, turnips, beet, &c., should not succeed each other even when of different natural orders.

Never transplant shrubs and trees in a growing state. However carefully it may be done, the check is dangerous, if not fatal.

Never tie up lettuces or endive, or earth up celery, except when perfectly dry.

GARDENING AND FARMING NOTES—Continued.

Never water the ground while the sun shines ; after sunset is the proper time.

Never allow the surface of the soil, in a pot or in the ground, to be long without stirring, unless it be naturally very open. It should be hoed over, at least once a fortnight.

Whenever a shrub or plant suffers the loss of root pruned off a corresponding part of the head.

Always cut off cleanly whatever part of a root may be broken, bruised, or damaged ; as it quickly begins to decay.

Prune all ornamental blooming trees and shrubs as soon as the flower has decayed ; before they make their new growth they can be shaped to any form.

In removing trees and shrubs never loosen the roots and fibres by violence or you may seriously affect the growth.

MANURE.—Plants are composed of the following constituents :—Potash, soda, lime, magnesia, silica, phosphorus, sulphur, iron, and one or two other ingredients. These constituents or food are derived principally from the ground. It therefore follows that for the plant to thrive and grow healthy, it must be able to obtain a sufficient supply from nature's treasury ; in fact, this chemical food for the plant must be as systematically supplied as food for an animal. The growth of a plant absorbs more or less of the earthy ingredients spoken of.

GARDENING AND FARMING NOTES—Continued.

It is evident if the land has not had this deprivation made good, the second crop will be a poorer one, from the simple fact that the food available for the second crop is considerably less; and the land will in time be exhausted. Manuring, then, is simply another name for furnishing to the earth those constituents which experience has shown to be necessary to the maturing of the plant. Farmyard manure, if properly prepared in heaps by alternate layers of garden soil and well sheltered from the rain and sun is about as fertilising an agent as can be used. Guano, bones, bone-dust, superphosphate of lime, nitrate of potash, nitrate of soda, and sulphate of ammonia, are the best substitutes.

The value of all manures depends upon the proportion of ammonia phosphate of lime and alkalies present in them.

The fallen leaves of trees when rotted into mould form an invaluable manure.

To poor sandy soils, marl or loam, or when procurable the soil from the bed of creeks or waterholes will be found of great service.

Animal or vegetable refuse should never be wasted even soap suds from the washing tray have great fertilising powers.

Three hundred lbs of guano will manure an acre so would 2 cubic yards of night soil if well and evenly spread.

GARDENING AND FARMING NOTES—Continued.

An acre of land contains 4 roods or 10 square chains or 160 rods or 4840 yards or 100,000 links. A chain consists of 100 links or 22 yards or 66 feet. The following various measurements show what constitutes an acre, and will enable any one to form an approximate estimate of the area of land.

5 yards wide by 968 yards long—10 yards wide by 484 yards long—20 yards wide by 242 yards long—40 yards wide by 121 yards long—70 yards wide by 68 1-9th yards long—80 yards wide by 60 $\frac{1}{2}$ yards long—60 feet wide by 726 feet long—120 feet wide by 363 feet long—220 feet wide by 198 feet long—240 feet wide by 181 $\frac{1}{2}$ feet long—440 feet wide by 99 feet long.

LAND OR SUPERFICIAL MEASURE.

144 square inches 1 square foot
9 square feet 1 square yard
272 $\frac{1}{2}$ feet or 30 $\frac{1}{2}$ yards 1 rod, pole, or perch
40 rods, poles or perches 1 rood
4 roods 1 acre
640 acres 1 square mile (a section of land).

LONG MEASURE.

12 inches 1 foot
3 feet 1 yard
5 $\frac{1}{2}$ yards 1 perch
40 perches 1 furlong
8 furlongs 1 mile

USEFUL RECEIPTS FOR HORSE AND CATTLE AILMENTS.

HORSES.—COUGHS & COLDS.—Are best treated by Bran Mash, with $\frac{1}{2}$ lb. of linseed, and one ounce of saltpetre to each mash.

GRIPES OR COLIC.—Give $\frac{1}{2}$ pint of linseed oil and $1\frac{1}{2}$ oz. of laudanum, (tincture of opium) in a little warm gruel. A glyster or enema of $\frac{1}{2}$ lb. of Epsom salts, and $\frac{1}{2}$ lb. of treacle dissolved in 3 quarts of warm water, will be found to materially assist the action of the medicine.

LINIMENT FOR STRAINS AND WOUNDS.—Mix together one ounce Goulard's Extract, one ounce of spirits of turpentine, one ounce of spirits of wine, and one pint of the strongest vinegar, apply by the hand or a piece of tow to the part affected.

COWS.—COLIC.—A good remedy is a pint of linseed oil mixed with $\frac{1}{2}$ oz. of laudanum.

MANGE.— $\frac{1}{2}$ lb. Black Brimstone $\frac{1}{2}$ pint turpentine, 1 pint of train oil. Mix together and rub well in over the part affected.

FOOT AND MOUTH DISEASE.—The following treatment is recommended by Mr. W. C. Bland:—Do not use measures or medicines that have a debilitating effect upon the system; do not bleed. Avoid drastic purgatives. Gentle aperients are advisable combined with medicines calculated to allay fever. The following mixture will be found useful, a dose being given every second or third day, $\frac{1}{2}$ oz. nitric ether, 4 oz. acetated liquor of ammonia, 3 drams

USEFUL RECEIPTS FOR HORSE AND CATTLE AILMENTS—Continued.

Peruvian bark powdered, 3 drams powdered gentian root. Take care to guard against constipation. Burnett's disinfecting fluid (chloride of zinc), in a highly diluted form may be applied to the parts where the skin is off; it is a powerful disinfectant and it assists the true skin in the formation of its new covering. The general treatment will consist of good nursing. A mixture of bran, malt dust, crushed oats, and hay chaff, mixed and scalded, given cool is a suitable food when the disease is at its worst.

PLEURO PNEUMONIA.—The only chances in the disease are the adoption of very prompt measures. Bleed early and repeat it if necessary, then give a Drench composed of 1 lb. Epsom salts, 1 oz.

powdered saltpetre, $\frac{1}{2}$ dram of tartar emetic. Give it in 2 pints of gruel and repeat in 6 or 8 hours.

SCOURING.—Give $\frac{1}{2}$ oz. of powdered catechu and 10 grs. of powdered opium in a little gruel.

CALVES.—CONSTIPATION OF THE BOWELS.—Two or three ounces of castor oil or linseed oil repeating the dose if necessary.

SCOURING.—The following mixture is strongly recommended it will do for all sucking animals and should always be in the house:—Prepared chalk 4 oz., powdered canella bark 1 oz., laudanum 1 oz., water 1 pint. Dose: two or three table spoonfuls according to the size of the animal two or three times a day.

USEFUL RECEIPTS FOR HORSE AND CATTLE AILMENTS—Continued.

SHEEP.—FOOTROT.—Acetate of copper, sulphate of copper, sulphate of zinc, of each one dram, nitric acid 2 drams, butter of antimony 2 drams, water 2 ounces. Pare away the horn and apply this lotion with a feather to the part affected.

TO PREVENT ROT.—Let the sheep always have lumps of salt to lick.

SCAB, OR SHAB.—Apply a lotion formed of one ounce of corrosive sublimate, four ounces of sal ammoniac, dissolved in four quarts of rain water. This is a powerful stimulant and poison, and must be used with caution. Break the scab, and rub in a few drops. A bottle with a notch cut in the side of the cork is the best means of application.

MERCURIAL OINTMENT for Scab—quicksilver 1 lb rancid lard 7 lbs.; rub the quicksilver with a small quantity of the lard, until the globules entirely disappear, afterwards add the remainder of the lard; some persons add a little powdered charcoal, to make it darker.

WOUNDS.—Wash the part, and apply a lotion formed of vinegar one pint, spirits of wine one ounce, spirits of turpentine one ounce, Goulard's extract one ounce. If the wound be a recent one it is better to stitch it up with separate ligatures, which can be easily withdrawn, and dress with cold water.

HINTS FOR PRESERVATION OF HEALTH AND THE PREVENTION AND SPREAD OF CONTAGIOUS DISEASES.

PROCESSES OF DISINFECTION.

Artificial disinfectants though of great value can never supply the place of cleanliness, ventilation, and drainage. The great natural disinfectant is fresh air abundantly and uninterruptedly supplied.

For purposes of artificial disinfection, use chloride of lime, quick-lime, Burnett's disinfecting fluid, (which is a concentrated solution of chloride of zinc) or Condy's fluid, (this is a solution of the permanganate of potash), or carbolic acid. Either of these solutions can be bought of any chemist.

Full directions for use accompany each bottle; In certain cases, powdered charcoal or fresh earth.

Where the matters requiring to be disinfected are matters having an offensive smell, the disinfectant should be used till the smell has entirely ceased.

An excellent disinfectant is green copperas. A pound and a half will make a gallon of disinfecting fluid. A tea spoonful put into the vessel every time before use by the patient renders the bowel discharge perfectly harmless.

In the ordinary emptying of privies or cesspools use may be made of perchloride of iron or Burnett's disinfecting fluid or sulphate of iron. But where disease is present, it is best to use chloride of lime

HINTS FOR PRESERVATION OF HEALTH, &c.—Continued.

or Condy's fluid. Where it is desirable to disinfect, before throwing away the evacuations from the bowels, the disinfectant should be put into the night-stool or bed-pan, when about to be used.

Heaps of manure or of other filth, if inexpedient to remove them, should be covered two or three inches with freshly-burnt vegetable charcoal in powder. If neither charcoal nor lime be at hand, the filth should be covered with some inches thick of clean dry earth. Dry earth is a powerful deodoriser, and when thus used produces a most valuable manure.

Earth near dwellings, if it has become offensive or foul by the soaking of decaying animal or vegetable matter, should be treated on the same plan.

Drains and ditches are best treated with chloride of lime, or with Condy's fluid, or with perchloride of iron. A pound of good chloride of lime will generally well suffice to disinfect 1,000 gallons of running sewage.

Linens and washing apparel requiring to be disinfected, should, without delay, be set to soak in water containing about two table spoonfuls to the gallon of Condy's fluid.

For the disinfection of *interior of houses*, the ceilings and walls should be washed with quick-lime water. The woodwork should be well cleansed with soap and water, and subsequently washed with a solution of chloride of lime about two ounces to the gallon.

MISCELLANEOUS.

EXAMINATION FOR LICENSED SURVEYORS.

The following Rules have been established since October 1st 1876, in respect to the examination of candidates desiring to qualify themselves as Licensed Surveyors under "The Crown Lands Alienation Act of 1868."

1. Each candidate before entering upon his examination for a license as a Surveyor, is required to produce to the Surveyor-General a certificate from a Staff or Licensed Surveyor, as to his term of service and general experience in field duties, and his competency to undertake surveys on his own responsibility. The term of service must in all cases extend over a period of not less than two years.

2. Candidates who hold licenses as qualified Surveyors under the Governments of the Australian Colonies and New Zealand, and who can produce certificates from the Surveyor-General of the colony in which they have been respectively employed, that the work entrusted to them has been performed in a satisfactory manner, are relieved from the necessity of serving the two years as required by the preceding clause.

3. Examinations will be held during the months of January and July in each year, due notice of which will be given in the *Government Gazette* and Brisbane local papers.

4. Candidates will be required to give at least ten days' notice of their intention to present themselves, enclosing with same a fee of £5 together with any testimonials of professional qualifications they may have previously obtained, which will be returned after the examination is completed. Each candidate is also required to produce his original field notes, plans plotted therefrom, and a specimen of drawing.

5. The course of examination will include the following subjects:—(a) Decimal arithmetic and fractions. (b) The use of logarithms. (c) The elements

of geometry. (d) Plain trigonometry. (e) Mensuration. (f) Plotting surveys, and checking same by calculation. (g) General knowledge of the details of practical surveying in the field. (h) Writing descriptions of boundaries. (i) The uses and adjustments of the theodolite and level. (k) Methods of obtaining the true meridian.

6. Candidates must be provided with a book of logarithms, a 20 and 40 scale, a parallel ruler, a protractor, and a pencil, when presenting themselves for examination.

SETTLEMENT ON THE LAND.

The Officers connected with the Land Department are bound to afford every facility and assistance to persons wishing to settle as will be seen by the following official instructions:—

With the view of facilitating the transaction of business at the Land Offices throughout the colony, it is hereby notified that instructions have been issued to the officers in charge, to the effect that every possible assistance is to be given freely and gratuitously to persons applying for land, or seeking information on matters connected with the working of the Land Acts—even to the extent of filling up forms of application, transfers, and other documents, for illiterate persons, if there is time at the officer's disposal; and that any Land Agent, or other officer, refusing to supply information, or receiving and appropriating fees for clerical assistance to his own use, on the matter being reported, will be severely dealt with.

For the convenience, however, of persons requiring copies of plans, arrangements have been made by which, on application to the District Land Commissioner, and on payment of a fee to be estimated by that officer, a tracing or copy of the plan required will be prepared and furnished to the individual requiring the same.

MEDICAL NOTES.

THE TREATMENT OF SCARLET FEVER AND DIPHTHERIA.

SCARLET FEVER.—This disease is highly contagious every effort should be adopted to isolate the patient and so prevent the disease spreading.

As soon as a case of the disease is discovered, remove the patient into an adjoining room and then fumigate the apartment he has occupied by burning sulphur therein, the windows, doors, chimney, or other apertures being closed during the process, which should be conducted so as to thoroughly fill the room with the sulphur fumes. Furniture, bedding, and clothing in the room at the time not to be removed, but to be subjected to fumigation as they stand. When the fumigation is completed bring the patient back into the room, afterwards subjecting the apartment he has just vacated to the same process. The sick room should be kept cool and with the windows open (unless weather is severe), until the period of desquamation, or peeling off of the skin, begins.

DIPHTHERIA.—The following remedy is strongly recommended by Dr. J. A. Moon, of Tasmania:—Powdered Ipecacuanha 20 grs., Tartar Emetic (potassio tartrate of antimony) 2 grs.—mix. To be taken for one dose in a little water at once as an emetic. In the case of females a smaller dose would suffice. As a gargle to be frequently used, mix one ounce of Beaufoy's Solution of Chloride of Soda with three ounces of water.

The following mixture is also to be taken in doses of a table spoonful 3 or 4 times a day:—Muriated Tincture of Iron (tinctura ferri mur) $\frac{1}{2}$ oz., water eight ounces. As the medicine acts on the teeth, the mouth should be well rinsed out after each dose.

Treatment of Scarlet Fever—Continued.

Mr. Greathed's Victorian remedy for this disease is, 4 drops of sulphuric acid in a glass of water to be taken once or twice a day. Sulphur fumigation while the patient is in the room, the fumes to be as dense as the patient can bear is also strongly recommended.

THE TREATMENT OF SUNSTROKE, SNAKEBITES &C.

SUNSTROKE.—When a person is seized with severe pains in the head, after exposure to the sun, and exhibits signs of an aberration of intellect, he may safely be supposed to be labouring under this disease. In that case, the person should, if out of doors, be removed to the nearest shady spot. Let the neck be uncovered, the head gently raised, and then trust entirely to dashing cold water upon the head and chest. Above all things, no bleeding. If in the house, but not within reach of medical advice or assistance, the treatment should be the same. To bleed a person struck down by sunstroke is in all probability to kill him. Persevere with the cold water until consciousness is quite restored. Do not be disheartened. Use the water freely, especially over the chest, letting it fall in a full stream from a foot or two in height. Be not misled by the symptoms, which may seem to be those of apoplexy, and on no account permit a drop of blood to be drawn. Where the symptoms are not absolute prostration, but severe pains in the head, and aberration of intellect, the patient should be closely watched, lest he make an attempt upon his own life. In all cases secure medical advice immediately.

SNAKE-BITES.—An easy diagnosis of snake-bite, apparently not generally known, even by the faculty,

TREATMENT OF SUNSTROKE AND SNAKE BITES—Continued.

is thus given in Krefft's *Snakes of Australia*:—Innocuous snakes, when they bite, leave marks thus:—

...
...
...

In case of snake bite the treatment recommended by Mr. Krefft is the following:—

Venomous snakes, when they bite, leave two punctures only, thus:— The first thing to be done is to suck the wound well. If the person who sucks out the poison has any scratch on his lips or mouth he runs some risk; but if there is no such wound he may suck the poison into his mouth with perfect safety. Before swallowing anything, he should wash his mouth with salt and water. The next thing is to stop circulation between the wound and the heart, by tying a bandage tightly round about the limb about an inch above the wound. Then the bitten part should be raised up with a forceps, or in the absence of an instrument, with the finger and thumb and a piece cut out not larger than a sixpence, nor deeper than one-sixth of an inch. If the flesh is well pulled up, there is no danger of cutting any of the veins or arteries; and the bleeding should be

promoted by warm water. As a further precaution when the bleeding ceases, an ipecacuanha poultice may be applied. This treatment should be accompanied by an internal remedy against the prostration of the nervous system caused by the poison. The best means is brandy or other spirits, taken pure, or as strong as the patient can take it. An amount of spirits that would intoxicate, or even destroy a person in ordinary circumstances, will not produce any degree of intoxication after the bite of a poisonous snake.

To a person under the influence of snake bite, brandy, whisky, or any other spirit may be given freely—about a wineglass every ten or fifteen minutes—until symptoms of intoxication are manifested.

DIARRHŒA.—In ordinary diarrhœa Chlorodyne will be found an invaluable remedy. It should have a place in every hut and house in the colony. In the early stage of dysentery it is also of service. It is said that the water in which gum leaves have been boiled, has been found very successful in obstinate cases of dysentery.

ACCIDENTS AND EMERGENCIES.

The following hints will be found of service in the absence of a doctor or "till the doctor comes." Where medical advice can be got, by all means obtain it:—

APOPLEXY.—Keep the head raised, put the feet in hot water, apply mustard plasters to the calves. Do not apply ammonia to the nose.

BITES.—The actual cautery (red-hot iron)—by no means so painful a remedy as is supposed—should be applied in all cases of dog bites where there is the slightest suspicion of the animal being rabid. A red-hot skewer will do.

BLEEDING AT THE NOSE.—Cold applications to head, face, and back of neck, and mustard and water to feet. In all cases of bleeding, ice is a powerful styptic and should be used if procurable.

BRUISES.—Bathe with spirit, as brandy, mixed with an equal proportion of vinegar and water. Leeches or continual ice will prevent inflammation.

In the case of blackeye, leeches will prevent discoloration if applied immediately after the injury. (So will extremely hot water.) Tincture of arnica is also very useful for bruises.

BURNS.—Several treatments are recommended, as—1. Bathe the part burnt or scalded (if limited in size) with a piece of soft linen dipped in warm spirits of turpentine or of wine, and then quickly cover it with a liniment of spirit of turpentine one part, and basilicon ointment two parts, thickly spread on rags. 2. Envelop the burn in cotton wool, and let it remain for several days. Afterwards apply zinc or chalk ointment or ordinary cerate. 3. Dredge well with wheat flour and let this remain on for sometime. 4. Apply lint wetted with carbonate of soda (or with equal parts of linseed oil and lime water). Do not puncture the blisters. Prevent the air getting to the burnt or scalded part.

CARBONIC ACID GAS.—In poisoning and suffocation by choke damp, or foul air from wells, the patient should be taken into the open air, and placed on his back, with head up, and cold water should be dashed over the body, bottles of hot water being placed to his feet. The lungs should be artificially inflated (see DROWNING). Apply ammonia to the nose.

NOTE.—In Apoplexy, Suffocation, and Drowning, the measures advised should be most perseveringly followed up.

CHOKING.—When food or a foreign substance gets lodged in the throat it is almost always in the mouth of the windpipe—immediately behind the tongue. Open the mouth to the widest extent, in-

trode the two forefingers, one on each side of the mouth, and push them over the tongue till they come in contact with the substance causing the obstruction; the points of the fingers should then be got under it and the substance extracted. It will assist the operation if the tongue is grasped by another person in the folds of a towel, and held out of the mouth. The mouth of the windpipe is much more easily reached than is generally supposed. In the case of children swallowing marbles or coin, the article may sometimes be dislodged by holding the patient up by the heels, and administering two or three sharp blows on the back.

CONVULSIONS IN CHILDREN.—Stout, florid children should be put in a warm bath, and cold affusion to the head practised. In many cases convulsions arise from teething; immediate relief can be given by lancing the gums. In the absence of a lancet a sharp penknife is nearly as good and can be used by anyone, taking care to cut the gums horizontally (in the direction of cheek to cheek) and not vertically.

DROWNING.—Life has been restored by eight and a-half hours of patient, continuous treatment, after the body has been submerged fourteen minutes. The chief agent is artificial respiration. Dr. Marshall Hall's rules are as follows:—

- "1. Treat the patient *instantly on the spot*.
- "2. Send for medical aid and for blankets, &c.

To Clear the Throat.

- "3. Place the patient gently on the face, with one wrist under the forehead.

To Imitate Respiration.

- "4. Turn the body gently, but completely, on the side and a little beyond, and then on the face alternately; repeating those measures deliberately, efficiently, and perseveringly, fifteen times in the minute only, and each time (5) when the prone position is resumed, make equable but efficient pressure along the spine; removing it immediately before rotation on the side.

"Continuing these measures—

- "6. Rub the limbs upwards with firm pressure and with energy, using handkerchiefs, etc.

"Replace the patient's wet clothing by such other covering as can be instantly procured, each bystander supplying a coat or a waistcoat," etc.

(Dr. Sylvester recommends artificial respiration, to be induced by the arms of the patient being alternately lifted over the head, and thrust together across the chest and abdomen.)

IMMIGRATION ACT OF 1872.

REMITTANCE PASSENGERS.

PERSONS resident in Queensland, wishing to obtain passages to the Colony for their friends or relatives in Europe, can do so under the Provisions of the New Immigration Act, by paying to the Immigration Agent in Brisbane, or to any of the Clerks of Petty Sessions in the Colony, amounts in accordance with the following scale :—

Males and Females, between 1 and 12, each	...	...	£1
Males, between 12 and 40, each	...	...	2
Females, between 12 and 40, each	...	...	1
Males and Females, above 40, each	...	...	4
Infants under 12 months, Free.			

HIRE OF LABORERS IN EUROPE.

EMPLOYERS of labour in the Colony are directed to the liberal provisions contained in the New Act, whereby Mechanics, Laborers, or Servants, engaged through Agents in Europe, will be provided with passages to the Colony by the Agent-General.

Applications from employers will be received by the Immigration Agent in Brisbane, or by any of the Clerks of Petty Sessions in the Colony, from whom further particulars and all necessary forms can be obtained.

ROBERT GRAY,
Immigration Agent.

The Bank grants Letters of Credit on demand, or Bills, at three or thirty days' sight, upon its Branches, at the customary rates, on the money being deposited. Similar Letters of Credit may be procured from its Agents in all the principal Towns throughout England, Scotland, and Ireland. The Bank also negotiates, and sends for collection, Bills on the Colonies, the terms for which may be obtained on application at its London Office. At its Branches in the Colonies it undertakes all descriptions of Banking and Exchange business.

Circular Notes are issued by its Branches, in sums of £10, £20, or £50, negotiable by its correspondents in the chief Cities on the Continent of Europe, in North and South America, Ceylon, Mauritius, India, China, Japan, and Africa.

Share Registers are kept at Melbourne, Sydney, Brisbane, Adelaide, Hobart and Launceston, and at Christchurch, New Zealand, to any of which English and Colonial Shares can be transferred—the Bank affording every facility to its Proprietors for this purpose. Dividends are paid upon receipt of Telegraphic advice.

Brisbane, 16th August, 1876.

THE
QUEENSLANDER,
PUBLISHED IN BRISBANE
EVERY SATURDAY MORNING,
IN TIME FOR THE MAILS.

THIS JOURNAL has especial facilities for acquiring and publishing Information valuable to Colonists engaged in Agricultural, Mining, and General Business Pursuits. As a practical and useful aid to the Country Settler it is unsurpassed by any journal in Australia.

Accessions have just been made to the Literary Staff of the journal, which now comprises one of the first London correspondents of the day, as also several of the ablest Press writers in Australia, including special correspondents at Sydney, Melbourne, Adelaide, and New Zealand. Arrangements are now completed for the engagement of the best correspondents obtainable at Singapore and San Francisco. With such aids the Proprietors are enabled to keep up a continuous succession of Essays and Articles upon the leading subjects of the day; and to present Intercolonial and European Correspondence, Sketches, Tales, Scientific and Useful Information, Poetry, and General Literary matter, equal to any journal in Australia.

Posted to any Address in Australia, 21s. per annum, 6s. 6d. per Quarter

PAYABLE IN ADVANCE.

THE
BRISBANE COURIER.

PUBLISHED DAILY.

The *Courier* has, from its establishment in 1849, maintained its position as the

LEADING JOURNAL OF THE COLONY.

The Proprietors have recently secured the services of several of the

ABLEST PRESS WRITERS OF AUSTRALIA,

INCLUDING

SPECIAL CORRESPONDENTS FOR NEW SOUTH WALES, VICTORIA,
SOUTH AUSTRALIA, AND NEW ZEALAND.

THE SERVICES OF A FIRST-CLASS LONDON CORRESPONDENT

HAVE ALSO BEEN OBTAINED.

Arrangements have also been completed for the services of Special Correspondents in Singapore and San Francisco.

SUBSCRIPTION, 15s. PER QUARTER.

[29]

NEWSPAPER ADVERTISEMENTS.

ESTABLISHED 1864.

THE "WARWICK ARGUS,"

THE OLDEST ESTABLISHED NEWSPAPER IN WARWICK,
Is Published every Thursday morning at the Office,

Agency for the Liverpool and London and Globe Insurance
Company.

THE "MARYBOROUGH CHRONICLE."

Published every Tuesday, Thursday, and Saturday

ESTABLISHED. NOVEMBER, 1860.

Subscription, 9s. per Quarter, paid in Ad-
vance; 10s. per Quarter, Credit.

THE CHRONICLE has, from its establishment, maintained its
position as the

LEADING NEWSPAPER

OF THE WIDE BAY AND BURNETT DISTRICTS,

And has long been recognised as the

BEST ADVERTISING MEDIUM.

Office—KENT STREET, MARYBOROUGH.

The Darling Downs Gazette,

(ESTABLISHED 1858.)

Is the oldest Provincial Journal in Queensland, and has a Larger Circulation than any other Newspaper throughout the SOUTHERN and WESTERN DISTRICTS of the Colony. A more advantageous medium of Advertising therefore could not be found.

The "DARLING DOWNS GAZETTE" is Published at an early hour, every WEDNESDAY and SATURDAY MORNING.

Subscription Six Shillings per quarter, or Five Shillings if paid in Advance.

Publishing Office—Ruthven Street, Toowoomba.

WHITE & STEPHENS, Proprietors.

THE DALBY HERALD

AND

WESTERN QUEENSLAND ADVERTISER,

A WEEKLY NEWSPAPER,

PUBLISHED every SATURDAY, in time for the morning's Mail to the Metropolis, and forwarded by same day's post to Condamine, Roma, Charleville, St. George, Surat, Tambo, Taroom, &c., in which places, as well as in the Western Districts generally, it has an extensive circulation, affords the best medium for Advertising to Merchants, Agents, Storekeepers, and Traders generally, and all having communication with the Western Country, and the Squatting Interest situate in those parts. The latest News by every Mail, Foreign and Colonial, and Telegrams up to Friday night.

MICHAEL JORDAN, Proprietor and Publisher,

STUART STREET, DALBY.

THE BORDER POST

AND

STANNUM MINER

NEWSPAPER,

PRINTED and Published by J. WILSON PILLAR, sole Proprietor, at his General Printing Office, Maryland Street, Stanthorpe,

EVERY FRIDAY MORNING.

Subscription, per Quarter, in advance - - 5s. 0d.

" " credit - - 6s. 6d.

Arrangements have been made for the literary conduct of this Journal which cannot fail to establish its equality with any other provincial publication in the colony. Published upon the Border of Queensland and New South Wales, in the very centre of the Tin Mines, and having a large circulation throughout the colonies, this Paper is unsurpassed as an ADVERTISING MEDIUM.

JOB PRINTING

Of Every Possible Description, executed with Neatness and Despatch.

THE "COOKTOWN COURIER,"

A BI-WEEKLY PAPER,

Published every Wednesday and Saturday Morning.

GREEN STREET, COOKTOWN.

TERMS OF SUBSCRIPTION :—

10s. 6d. per Quarter, £1 10s. per Annum,

In all cases payable in advance.

To the Advertising public THE COURIER affords peculiar advantages. Circulating in a sphere almost exclusively its own and comparatively untouched by any other organ, it presents facilities of which few other papers can boast.

CHARGES FOR ADVERTISING.

THE PEAK DOWNS TELEGRAM

(ESTABLISHED 1864),

Has the Largest Circulation,

AND IS THE

OLDEST ESTABLISHED PAPER

In the Interior of Central and Northern Queensland.

PUBLISHED EVERY SATURDAY MORNING.

NEWSPAPER ADVERTISEMENTS.

THE "WESTERN STAR,"

IS PUBLISHED
EVERY SATURDAY,

AT ROMA,

And despatched by the Mails which leave on that day to
ALL PARTS OF THE WESTERN DISTRICTS.

IT HAS A LARGE AND

CONSTANTLY INCREASING CIRCULATION

Amongst the Squatters and others in the Maranoa, Warrego, Dawson,
Balonne, and Barcoo Districts, and is thus

One of the best Advertising Mediums in the Colony.

F. KIDNER,
PROPRIETOR.

THE SPECIAL QUEENSLAND EDITION

OF

The Australasian Sketcher,

Is Published at the Office, Queen Street, Brisbane,

ON EVERY FOURTH SATURDAY,

In time for the Torres Straits Mail.

NUMEROUS illustrations, little inferior in merit to those in the best English papers, of special interest to Queenslanders, are now being issued, and each month a Summary of news is given, rendering it not only an interesting paper for the Home Circle here, but, when read, a most acceptable journal for sending to friends at home.

YEARLY SUBSCRIPTION (thirteen numbers) 6s. 6d.

Publishers—GORDON & GOTCH.

The Australian Handbook and Shippers and Importers Directory.

THIS WORK IS PUBLISHED AT THE COMMENCEMENT OF EACH YEAR.

Is a Complete Guide to the whole of Australasia. It has been considerably enlarged and will be found an invaluable Book of Reference. Numerous Maps accompany it.

Published Monthly.

THE AUSTRALASIAN A. B. C. GUIDE.

A TRAVELLERS Guide to the Railways, Roads, Steamboats, Omnibusses, Cabs, and other conveniences in the Colony of Queensland, also in the Colonies of New South Wales, New Zealand, South Australia, Tasmania, Victoria, and West Australia. This publication is an indispensable companion to the Traveller throughout Australia and New Zealand. It has received the most flattering notices from the Press in all the Colonies. It gives in a concise, intelligible, and comprehensive form a vast fund of travelling information, and the Time Tables and information generally are arranged upon a new and more easily understood plan than that in general use. Price 1s. Yearly Subscription, 10s., Posted, 12s.
